USDA Announces Additional Assistance for Distressed Farmers Facing Financial Risk

The U.S. Department of Agriculture (USDA) today announced that beginning in April it will provide approximately \$123 million in additional, automatic financial assistance for qualifying farm loan program borrowers who are facing financial risk, as part of the \$3.1 billion to help distressed farm loan borrowers that was provided through Section 22006 of the Inflation Reduction Act (IRA). The announcement builds on financial assistance offered to borrowers through the same program in October 2022.

The IRA directed USDA to expedite assistance to distressed borrowers of direct or guaranteed loans administered by USDA's Farm Service Agency (FSA) whose operations face financial risk. For example, in the October payments, farmers that were 60 days delinquent due to challenges like natural disasters, the pandemic or other unexpected situations were brought current and had their next installment paid to give them breathing room.

In October 2022, [USDA provided approximately \\$800 million](#) in initial IRA assistance to more than 11,000 **delinquent direct and guaranteed borrowers** and approximately 2,100 borrowers who had their farms liquidated and still had remaining debt. USDA shared that it would conduct case-by-case reviews of about 1,600 complex cases for potential initial relief payments, including cases of **borrowers in foreclosure or bankruptcy**. These case-by-case reviews are underway.

At the same time in October 2022, USDA announced that it anticipated payments using separate pandemic relief funding totaling roughly \$66 million on over 7,000 direct loans to borrowers who used the USDA Farm Service Agency's **disaster-set-aside** option during the

COVID-19 pandemic. The majority of these payments have been processed and USDA anticipates it will complete all such payments in April 2023.

New Assistance for Distressed Borrowers

FSA intends to provide the new round of relief starting in April to additional distressed borrowers. This will include approximately \$123 million in automatic financial assistance for qualifying Farm Loan Program (FLP) direct loan borrowers who meet certain criteria. Similar to the automatic payments announced in October 2022, qualifying borrowers will receive an individual letter detailing the assistance as payments are made. Distressed borrowers' eligibility for these new categories of automatic payments will be determined based on their circumstances as of today. More information about the new categories that make up the \$123 million in assistance announced today and the specific amount of assistance a distressed borrower receives can be found described in this fact sheet, [IRA Section 22006: Additional Automatic Payments, Improved Procedures, and Policy Recommendations](#).

To continue to make sure producers are aware of relief potentially available to them, all producers with open FLP loans will receive a letter detailing a new opportunity to receive assistance if they took certain extraordinary measures to avoid delinquency on their FLP loans, such as taking on more debt, selling property or cashing out retirement accounts. The letter will provide details on eligibility, the specific types of actions that may qualify for assistance, and the process for applying for and providing the documentation to seek that assistance.

These steps are part of a process USDA announced along with the October payments that is focused on assisting borrowers unable to make their next scheduled installment. Earlier this year, all borrowers should have received a letter detailing the process for seeking this type of assistance even before they become delinquent. Borrowers who are within two months of their next installment may seek a cashflow analysis from FSA using a recent balance sheet and operating plan to determine their eligibility.

Tax Resources

USDA will continue to work with the Department of Treasury to help borrowers understand the potential tax implications from the receipt of an IRA payment, including that options may be available to potentially avoid or alleviate any tax burden incurred as a result of receiving this financial assistance.

In early April, USDA will send a specific set of revised tax documents, educational materials and resources to borrowers that received assistance in 2022, including a link to a webinar hosted by a group of farm tax experts to provide education on the options available. USDA cannot provide tax advice and encourages borrowers to consult their own tax professional, but FSA is providing educational materials for borrowers to be aware of the options. USDA has tax-related resources available at farmers.gov/taxes.

Improved Procedures and Policy Recommendations

FSA is finalizing changes to its policy handbooks to remove unnecessary hurdles, improve loan making and loan servicing and provide more flexibility on how loans are structured to maximize the opportunities for borrowers. Additional details on those changes can be found in the linked fact sheet and are the start of a broader set of process enhancements. The fact sheet also provides information on the eight, no-cost legislative proposals included in the Fiscal Year 2024 President's Budget that are designed to improve the borrower experience.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America. Is the Noninsured Crop Disaster Assistance Program Right for You?

Farmers and ranchers rely on crop insurance to protect themselves from disasters and unforeseen events, but not all crops are insurable through the USDA's Risk Management Agency. The Farm Service Agency's (FSA) Noninsured Crop Disaster Assistance Program (NAP) provides producers another

option to obtain coverage against disaster for these crops. NAP provides financial assistance to producers of non-insurable crops impacted by natural disasters that result in lower yields, crop losses, or prevents crop planting.

Commercially produced crops and agricultural commodities for which crop insurance is not available are generally eligible for NAP. Eligible crops include those grown specifically for food, fiber, livestock consumption, biofuel or biobased products, or value loss crops such as aquaculture, Christmas trees, ornamental nursery, and others. Contact your local FSA office to see which crops are eligible in your state and county.

Eligible causes of loss include drought, freeze, hail, excessive moisture, excessive wind or hurricanes, earthquake and flood. These events must occur during the NAP policy coverage period, before or during harvest, and the disaster must directly affect the eligible crop. For guidance on causes of loss not listed, contact your local FSA county office.

Interested producers apply for NAP coverage using FSA form [CCC-471](#), "Application for Coverage," and pay the applicable service fee at the FSA office where their farm records are maintained. These must be filed by the application closing date, which varies by crop. Contact your local FSA office to verify application closing dates and ensure coverage for eligible NAP crops.

At the time of application, each producer acknowledges they have received the [NAP Basic Provisions](#), which describes NAP requirements for coverage. NAP participants must report crop acreage shortly after planting and provide verifiable or reliable crop production records when required by FSA.

Producers are required to pay service fees which vary depending on the number of crops and number of counties your operation is located in. The NAP service fee is the lesser of \$325 per crop or \$825 per producer per administrative county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties. Premiums also apply when producers

elect higher levels of coverage with a maximum premium of \$15,750 per person or legal entity.

A producer's certification on Form CCC-860 *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification* may serve as an application for basic NAP coverage for all eligible crops beginning with crop year 2022. These producers will have all NAP-related service fees for basic coverage waived, in addition to a 50 percent premium reduction if higher levels of coverage are elected.

For more detailed information on NAP, download the [NAP Fact Sheet](#). To get started with NAP, we recommend you contact your [local USDA service center](#).

USDA Microloans Help Farmers Purchase Farmland and Improve Property

Farmers can use USDA farm ownership microloans to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013.

Microloans can also help with farmland and building purchases and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program, visit fsa.usda.gov/microloans.

The Importance of Responding to NASS Surveys

USDA's National Agricultural Statistics Service (NASS) conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture.

If you receive a survey questionnaire, please respond quickly and online if possible.

The results of the surveys help determine the structure of USDA farm programs, such as soil rental rates for the Conservation Reserve Program and prices and yields used for the Agriculture Risk Coverage and Price Loss Coverage programs. This county-level data is critical for USDA farm payment determinations. Survey responses also help associations, businesses and policymakers advocate for their industry and help educate others on the importance of agriculture.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

NASS data is available online at nass.usda.gov/Publications and through the searchable [Quick Stats database](#). Watch a video on how NASS data is used at youtube.com/watch?v=m-4zjnh26io&feature=youtu.be.
