UNITED STATES DEPARTMENT OF AGRICULTURE

Farm Service Agency Washington, DC 20250

Common Payment System	
9-CM	Amendment 9

Lag Tainm

Approved by: Acting Deputy Administrator, Farm Programs

Amendment Transmittal

A Reasons for Amendment

Subparagraph 17 B has been amended to update that overpayments are transferred to NRRS on the 20^{th} workday.

Subparagraph 51 B has been amended to include program years 2012 and 2013 for ACRE and DCP processing.

Subparagraph 54 A has been amended to provide an updated example of the Common Payment Reports Menu.

Subparagraph 61 A has been amended to add the new Pending Overpayment Summary Report to the list of reports available through the Common Payment Reports System.

Paragraph 64.5 has been added to provide procedure for the new Pending Overpayment Summary Report.

Subparagraph 65 A has been amended to provide that the Pending Overpayment Report is accessed through the Pending Overpayment Summary Report.

Exhibit 4, subparagraph F has been amended to provide CRP program years and applicable subparagraph references.

Exhibit 9, subparagraphs B through F have been added to provide eligibility values for conservation programs.

Part 1 Basic Information

1 Handbook Purpose, Related Handbooks, and Sources of Authority

A Handbook Purpose

This handbook:

- provides information related to the common payment process for web-based payment applications
- describes general policy applicable to payments administered by FSA
- provides policy and procedure information related to direct attribution
- provides a comprehensive description of the common payment system and how payments using this system are processed
- describes a series of standardized reports developed to assist State and County Offices with the administration of program payments.

B Related Handbooks

The following FSA handbooks are related to farm program payment applications and payments.

Topic	Related Handbook
Adding customers or maintaining SCIMS information	1-CM
Procedure for updating HEL and WC determinations in the	3-CM
web-based system	
Payment reductions and violations	4-CP
Policy about HEL and WC provisions	6-CP
*Policy and procedure for TIP	2-CRP *
Policy about DCP and ACRE	1-DCP
Procedure for recording DCP and ACRE contract data in the	2-DCP (Rev. 1)
web-based system	
Depositing remittances	3-FI
Policy about claims and withholdings	58-FI
Policy for handling prompt payment interest penalties	61-FI
Policy for reporting data to IRS	62-FI
Policy for assignments and joint payees	63-FI
Procedure for establishing and reporting receivables in NRRS	64-FI

1 Handbook Purpose, Related Handbooks, and Sources of Authority (Continued)

B Related Handbooks (Continued)

Topic	Related Handbook
Policy about LIP, LFP, and ELAP	1-LDAP
*Policy about NAP	1-NAP
Policy about Loss Adjuster Management	2-NAP *
Policy about payment limitation provisions including determinations for "actively engaged in farming", "person", and AGI eligibility	1-PL
Software procedure for recording information in the joint operation and permitted entity files on the System 36	2-PL
Software procedure for recording eligibility determinations and certifications, combined producer information, payment limitation, *and farm operating plan information in the web-based* environment	3-PL (Rev. 1)
Policy about payment limitation provisions including determinations for "actively engaged in farming", direct attribution, and AGI eligibility for 2009 and subsequent crop years	4-PL
Policy about SURE	1-SURE
Policy about TAP	1-TAP

C Sources of Authority for Direct Attribution Provisions

The Food, Conservation, and Energy Act of 2008 amended the Food Security Act of 1985 to provide for the following:

- payments are limited by direct attribution to persons and legal entities
- the permitted entity rule was **repealed**

Note: Payments can be received through any number of legal entities with **no** designation required.

- restricted payment to Federal and State/local governments
- created new rules for eligibility based on average AGI.

See 4-PL for additional information.

1 Handbook Purpose, Related Handbooks, and Sources of Authority (Continued)

D Sources of Authority for "Person" Provisions

Authority for the administration of the payment limitation and payment eligibility provisions is provided by Sections 1001, 1001A, 1001B, 1001C, and 1001D of the Food Security Act of 1985. The Omnibus Budget Reconciliation Act of 1987 and subsequent acts amended the Food Security Act of 1985 to:

- define the term "person"
- provide that a State, political subdivision, and agencies thereof are considered 1 "person"
- provide the rules under which a husband and wife may be separate "persons"
- include "cash rent tenant" provisions
- require that producers be "actively engaged in farming" to be eligible for certain programs
- limit payment to foreign persons
- limit the creation of entities to qualify as separate "persons" for payments.

See 1-PL (Rev. 1) for additional information.

E Sources of Authority for Program-Specific Provisions

Sources of authority for other payment eligibility provisions are provided in the handbook published for the applicable program.

2-10 (Reserved)

		·

11 Overview

A Common Payment Process

Each program administered by FSA has payment eligibility rules and provisions that must be applied when determining whether a producer is eligible to receive a payment or a program benefit. While all rules and provisions may not apply to all programs, the provisions of those rules are generally consistent from one program to the next if the rule is applicable.

Example: Cash rent tenant provisions are not applicable to SURE, so it is not checked when processing SURE payments.

However, cash rent tenant provisions are applicable to DCP and ACRE. When determining whether the producer meets these provisions, the same eligibility conditions apply to both DCP and ACRE.

B Included In This Section

This section includes general provisions that are applicable when determining whether payment entities or members of a joint operation or entity are eligible to receive payment or program benefits.

The rules in this section are used by the common payment process described in Part 4.

Note: Refer to the applicable program handbook for exceptions that may apply.

12 Eligible ID and Business Types

A Importance of Recording Data Correctly in SCIMS

The common payment process uses information recorded in SCIMS to properly process each payment. The SCIMS information is used to determine:

- which rules apply to the particular type of operation that has applied for the program benefit or payment
- whether the payment entity and/or member is eligible to receive payment.

It is critical that information recorded in SCIMS is accurate and maintained according to 1-CM. Failure to do so could result in issuing improper payments.

B Eligible Business Types

Depending on the rules applicable to the program, statutes may prohibit payment to producers with certain business types. Without regard to applicable eligibility provisions that apply to each specific program, this table identifies all the business types in SCIMS and specifies which business types are generally eligible for payment under direct attribution or "person" provisions. See the applicable program handbook for possible exceptions.

SCIMS Business	SCIMS		Not	Eligible for

C Special Provisions for State and Local Governments

Generally State and local governments were eligible to receive payment before enactment of the Food, Conservation, and Energy Act of 2008.

Payments to State and local governments are not authorized for 2009 and future years except for multi-year contracts approved before October 1, 2008, such as those applicable to CRP and EQIP. Under those programs, State and local governments continue to be eligible under the terms and conditions of the contract originally approved. See the following for additional information:

- 4-PL for payment limitation and payment eligibility provisions
- program-related handbook for specific program eligibility provisions.

12 Eligible ID and Business Types (Continued)

D Special Provisions for Public Schools

Generally public schools were eligible to receive payment before enactment of the Food, Conservation, and Energy Act of 2008. For 2009 and future years, public schools are only eligible to receive payment if both of the following apply:

- land for which payments are received is owned by the State, political subdivision, or agency thereof
- payments are used solely for the support of public schools.

If both conditions are:

- met, then the payment entity must be classified in SCIMS as a "public school"
- not met, then the payment entity cannot be classified as a "public school".

See the following for additional information:

- 1-CM for information on recording business types in SCIMS
- program-related handbook for specific program eligibility provisions.

12 Eligible ID and Business Types (Continued)

E Eligible ID Types

The following tax ID types are eligible for payment if the business type is also eligible for the applicable program.

Tax ID Type	Eligible Business Types		
Social Security	Individual		
Number	Revocable Trust		
	Limited Liability Company		
Employer ID	General Partnership

	Indian Tribal Venture		
	Limited Liability Company		
Federal ID Number	Federal Owned		
IRS-Issued ID	Individual		
Number			
No Tax ID	Indians Represented by BIA		

13 Payment Eligibility

A Payment Subsidiary Eligibility for Individuals

The web-based eligibility system, as determined by the applicable program, is read to determine whether an individual is eligible to receive payments.

Note: See the applicable exhibit to determine which eligibility determinations/certifications apply to the program and are eligible conditions for which payments may be issued to an individual.

B Payment Subsidiary Eligibility for Joint Operations and Members

The web-based eligibility system, as determined by the applicable program, is read to determine whether a joint operation is eligible to receive payments.

If it is determined that the joint operation is eligible to receive payments, the web-based eligibility system is read to determine whether the first level members of the joint operation are also eligible to receive payments. If 1 or more of the first level members is also a joint operation, the web-based eligibility system is read to determine whether the members of the embedded joint operation are eligible to receive payments. This process is continued until eligibility has been checked for all members of embedded joint operations.

See Exhibit 4 for additional information.

13 Payment Eligibility (Continued)

C Payment Subsidiary Eligibility for Entities and Members

The web-based eligibility system, as determined by the applicable program, is read to determine whether an entity and/or members of an entity are eligible to receive payments.

If it is determined that the entity is eligible to receive payments, the web-based eligibility system is read to determine whether the members of the entity are eligible. Generally, only AGI compliance and foreign person provisions are applicable to members of entities.

See Exhibit 4 for additional information.

D Payment Subsidiary Eligibility for Entities Without Members

The following entities may be eligible for payments but do not have members with an ownership interest:

- revocable trust using a Social Security number
- limited liability company using a Social Security number
- State, Federal, and local government
- churches, charities, and non-profit organizations
- public schools
- Indian tribal ventures
- Indians represented by BIA.

The web-based eligibility system, as determined by the applicable program, is read to determine whether an entity is eligible to receive payments.

See Exhibit 4 for additional information.

14 Cropland Factor

A Introduction

The cropland factor, if applicable, must be entered in the web-based eligibility system if the producer or member does not meet or partially meets cash rent tenant provisions. The cropland factor affects the calculation of payments as well as the calculation of effective payment limitation, if cash rent tenant provisions apply to the program.

Note: Cash rent tenant provisions are only applicable to a limited number of programs, such as DCP and ACRE. See Exhibit 4 or the applicable program handbook for payment eligibility provisions applicable to each program.

B Cropland Factor Affect on Calculation of Payment for Payment Entity

If cash rent tenant provisions apply to the program, the cropland factor affects the calculation of the payment.

Example: Individual has a 50 percent cropland factor. The gross payment calculates to \$100. When cropland factor is applied, the individual's payment is calculated to \$50 to reflect the 50 percent reduction.

C Cropland Factor Affect on Effective Payment Limitation for Entity

If cash rent tenant provisions apply to the program, the cropland factor affects the calculation of effective payment limitation.

Example: Entity has a 100 percent cropland factor. The gross payment calculates to \$100. All members of the entity have cropland factors of 0 percent because COC has determined the members do not meet cash rent tenant provisions. The members' cropland factor has no affect on the calculation of the \$100 payment; however, it does affect the calculation of the effective payment limitation for each member. The application of 0 percent cropland factor to each member's payment limitation results in an effective payment limitation of \$0 for the each member.

Since the payment cannot be attributed to the member, because of payment limitation, the amount payable to the entity is reduced by that member's ownership interest. In this example, the entity would have a \$0 effective payment limitation.

Note: A cropland factor is not applicable for members of entities unless an actual cash rent tenant determination has been made by COC for the member. Typically, this determination is not made for members of entities unless the member has a separate farming operation.

14 Cropland Factor (Continued)

D Cropland Factor Affect on Calculation of Payment and Effective Payment Limitation for Joint Operation

The cropland factor affects:

- the calculation of payment for a joint operation
- both the calculation of payment and effective payment limitation for the members.

Example: A Joint operation has a cropland factor of 50 percent. The joint operation consists of 2 members of which 1 has a cropland factor of 100 percent and the other has a cropland factor of 20 percent. The gross payment calculates to \$100. The joint operation's 50 percent cropland factor is applied resulting in a calculated payment of \$50. The members' cropland factor of 100 percent and 20 percent are then applied resulting in a calculated payment of \$30. Effective payment limitation for each member of the joint operation has been reduced by 50 percent because of the joint operation's cropland factor.

15 Payment Limitation

A Specific Program Payment Limitations

The following indicates the applicable payment limitations for a person or legal entity for specific programs.

		Payment Limitation Per Year
Program	Additional Information	(2008 and future)
CRP, EFCRP, SAFE,	Payment limitation rules are set for the	\$50,000
and TIP	contract at contract approval. As such,	
	some contracts are subject to 1-PL	
	provisions and some are subject to 4-PL	
	provisions.	
DCP Direct and ACRE	If the person or legal entity is enrolled in	\$40,000
Direct, except peanuts	ACRE, this limitation will be reduced.	
DCP Direct and ACRE	The maximum reduction applicable is	\$40,000
Direct, peanuts only	\$8,000.	
DCP Counter-Cyclical	If the person or legal entity is enrolled in	\$65,000
and ACRE, except	ACRE, this limitation will be increased.	
peanuts	The maximum increase applicable is	
DCP Counter-Cyclical	\$8,000.	\$65,000
and ACRE, peanuts only		
ELAP, LFP, LIP and	One payment limitation applies	\$100,000
SURE	collectively to all payments issued under	
	these programs for the applicable	
	program year.	
NAP		\$100,000
TAP		\$100,000

See 1-PL, 4-PL, or the applicable program handbook to determine whether adjustments to the program payment limitation are applicable.

Note: See:

- 1-PL for payment limitation provisions for 2008 and prior years
- 4-PL for payment limitation provisions for 2009 and future years.

15 Payment Limitation (Continued)

B Calculating Effective Payment Limitation

Use the following calculation to determine the effective payment limitation:

- program payment limitation, times
- attribution share, times
- cropland factor, if applicable to the program, plus or minus
- payment limitation adjustments.

See the following for additional information:

- paragraph 28 for determining attribution share
- paragraph 14 for determining applicability of cropland factor
- 3-PL, 4-PL, or the applicable program handbook for program adjustments.

C Calculating Available Payment Limitation Balance

Use the following calculation to determine the available payment limitation balance:

- effective payment limitation, minus
- prior payments issued or attributed to the payment entity/member, minus
- prior payments issued or attributed to another producer that is combined with the payment entity/member.

Example: \$40,000 (effective payment limitation)

- \$10,000 (payments issued or attributed) \$30,000 (available payment limitation balance)

Joint Operations and Entities

A Introduction

The Food, Conservation, and Energy Act of 2008 provides that the payment amounts shall be "attributed to a person by taking into account the direct and indirect ownership interests of the person in a legal entity that is eligible to receive the payments."

*--For the common payment process, member data for joint operation and entities is read according to this table.

IF the farm operation plan has	THEN member data for the joint operation or entity is read from
been initiated in the Business File System	the Business File System.
not been initiated in the Business File	the mainframe based on data that has been
System	uploaded from the permitted entity and joint
	operation data recorded on the System 36.

__*

B Obtaining Member Data

The Food, Conservation, and Energy Act of 2008 provides that each legal entity receiving payments shall provide the name and Social Security number of each person, or the name and TIN of each legal entity that holds or acquires an ownership interest in the legal entity.

Based on statutory requirements, if a member chooses not to provide TIN, then the entire payment entity is ineligible for payment.

Exception:

Some entities do not have members with an ownership interest. Member data is not required to be recorded for these types of entities. See subparagraph 13 D for a list of entities without members.

Joint Operations and Entities (Continued)

C Recording Member Data on the System 36

County Offices shall follow 2-PL to record member data through the joint operation and entity files on the System 36.

Reminder:

Data is uploaded to the mainframe through the normal subsidiary upload process. It may take from 4 calendar days to 2 weeks for the data to upload and be processed on the mainframe before it is available for use by the common payment process.

--D Multi-County Producers Not Recorded in the Business File Application--

If the joint operation or entity is a multi-county producer, then the member data is only read from the county designated as the multi-county recording county. If the County Office issuing the payment is not designated as the multi-county recording county for the payment entity, then the information that the county has loaded in the joint operation/entity file is not read.

Note: The multi-county recording county is listed in the "multi-county" section of the MABDIG in the "Rc St & Cty" field.

Although the member data is only read for the multi-county recording county, it is imperative that County Offices coordinate with all counties where the producer participates to ensure that the joint operation/entity file data is recorded accurately. If a new CCC-902 is filed on behalf of the joint operation/entity, that information must be provided to the multi-county recording county as soon as possible so the joint operation/entity file data can be corrected. Failure to do so could result in payments being attributed incorrectly to members which could result in issuing improper payments.

Note: See 2-PL for additional information.

E Recording Business File Member Information

As the Business File application is deployed and farm operating plans are recorded, member information will be retrieved from the business file information instead of the System 36 data.

The Business File application:

- only allows the member information to be recorded by the recording county designated in the subsidiary web-based system
- does **not** allow member information to be recorded in more than 1 county.

If a farm operating plan has been initiated in the Business File application and the payment being processed is for a web-based program, such as DCP, ACRE, CRP, etc., payments will be attributed to the members recorded in the Business File application regardless of what is recorded on the System 36 and uploaded to the mainframe. See 3-PL (Rev. 1) for additional information on the Business File application.

17 General Provisions for Overpayments

A Introduction

The common payment process is an integrated process that reads data from many systems to determine whether payments issued to a producer were earned in-full or in-part. These systems include, but are not limited to the following:

- application process for the applicable program
- subsidiary system including data about eligibility, combined producer, and ownership data
- SCIMS.

If something changes in any of these systems, the common payment process is automatically triggered to recalculate the payment. The producer is overpaid if the information that has been changed results in the current calculated payment amount to be less than the amount originally paid to the producer.

B Rules for Transferring Overpayment Amounts to NRRS

Legitimate debts payable to CCC shall be transferred to NRRS **immediately** upon identification so the producer is timely notified and debt collection procedures are initiated. For any overpayment amount calculated as \$1 or greater, the system will automatically:

- update the applicable overpayment information to the Pending Overpayment Report •*--transfer the overpayment to NRRS on the 20th workday.--*
- **Note:** Overpayments can result when updates are made to supporting files that are not necessarily legitimate debts. See subparagraph C for information on corrective action that should be taken to ensure that amounts that are not legitimate debts are not transferred to NRRS.

C 20-Day Hold

The system will automatically transfer overpayments to NRRS. However, a 20-day hold process has been developed that provides County Offices with the opportunity to take corrective action if an overpayment is computed in error.

--The 20-day hold starts on the date the overpayment is initially computed. If the payment amount or reason for the overpayment changes, then the 20-day hold will be reset so-- County Offices can determine whether additional corrective action is required.

Overpayments:

will automatically be transferred to NRRS on the 20th workday following the date the
overpayment was first identified unless corrective action is taken to update the system by
the County Office

Note: Overpayments transferred to NRRS will no longer be listed on the Pending Overpayment Report. The overpayment information will be listed on the Submitted Overpayments Report. See paragraph 64 for information on the Submitted Overpayments Report.

• should be transferred to NRRS immediately if the overpayment is determined to be a legitimate debt.

D Overpayment Reports

The following 2 reports are available through the Common Payment Reports System to identify overpayment amounts.

- Submitted Overpayments Report which identifies overpayments that have been
 --transferred to NRRS. Producers listed on the Submitted Overpayments Report will remain on the report indefinitely. See paragraph 64 for additional information on this-- report.
- Pending Overpayment Report which identifies computed overpayment amounts that have not yet been transferred to NRRS. This report includes overpayments on hold for 20 workdays or overpayments identified during advance payment cycles. See paragraph 65 for additional information on this report.
- *--Note: The Pending Overpayment Report is accessed through the Pending Overpayment Summary Report. See paragraph 64.5 for information about the Pending Overpayment Summary Report.--*

17 General Provisions for Overpayments (Continued)

*--E Handling Debts Less than \$100

All legitimate debts, regardless of amount, shall be transferred to NRRS. County Offices shall follow 58-FI for handling receivables less than \$100.

F Debt Basis Codes

The system automatically assigns the debt basis code to the receivable when it is transferred to NRRS, based on the type of condition that generated the overpayment. The following are the debt basis codes applicable to programs using the common payment process.

IF the reason the payment entity/member is overpaid is because of	THEN the discovery/debt basis reason sent to NRRS is
payment eligibility because of fraud	10-423.
payment limitation issues	10-426.
payment eligibility, except fraud	10-427.
prior payments exceed the current payment	10-428.

*

G Charging Interest

Generally interest shall be charged on receivables from the date the original payment was disbursed if COC determines that the producer is ineligible because of the following reasons.

- Producer signed to information on the applicable application or contract that is subsequently determined inaccurate.
- Producer erroneously or fraudulently represented any act affecting a payment eligibility determination.
- Producer knowingly adopted a scheme or device that tends to defeat the purposes of the program.

17 General Provisions for Overpayments (Continued)

G Charging Interest (Continued)

Generally, interest shall not be charged from date of disbursement if:

- overpayment resulted based on revised information that the producer would not have had reason to know was invalid, such as the calculation of the RMA guarantee basis
- FSA National, State, or County Office erred
- producer voluntarily refunds the payment that was issued and COC has not determined that the producer is ineligible.

Notes: Software does not currently support charging interest from the date of disbursement. Any receivable established is sent to NRRS with the current system date. If the receivable is not repaid within 30 calendar days from the date the initial notification letter is issued, interest will start accruing from the date the receivable was established.

If COC determines that the producer is ineligible and interest should be charged from the date of disbursement:

- County Offices shall contact their State Office for assistance
- State Offices shall contact OBF for guidance.

See the applicable program handbook for any exceptions that may apply to each specific program.

18-24 (Reserved)

25 Overview

A Statutory Requirements

The Food, Conservation, and Energy Act of 2008:

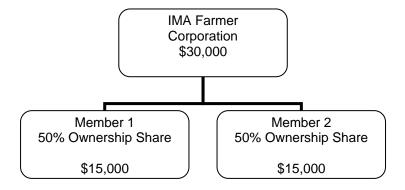

- provides that "each payment made directly to a person shall be combined with the pro rata interest of the person in payments received by a legal entity in which the person has a direct or indirect ownership interest unless the payments of the legal entity have been reduced by the pro rata share of the person"
- provides that "each payment made to a legal entity shall be attributed to those persons who have a direct or indirect ownership interest in the legal entity unless the payment to the legal entity has been reduced by the pro rata share of the person"
- repeals the 3-entity rule whereby individuals were required to designate up to 3 payment entities through which they chose to receive payment.

B Basic Concept

The basic concept for direct attribution is that:

- amounts payable to a joint operation or entity will be attributed to the members based on each member's ownership interest in the farming operation
- payment limitation provisions will be applied to the members of joint operations and entities, thereby potentially affecting the payment amount that can be issued to the joint operation or entity.

Example: IMA Farmer is a corporation earning a \$30,000 DCP-Direct payment. There are 2 members, each with a 50 percent ownership interest. Assuming all eligibility requirements are met, the payment will be attributed to the members as follows.

25 Overview (Continued)

C Entities Without Members

Although the statute requires that payments to legal entities be attributed to members with an ownership interest, there are some legal entities that do not have members with a direct or indirect ownership interest. As such, payment amounts are not attributed to members of the following entities:

- revocable trust using a Social Security number
- church, charity, or non-profit organization
- public school
- Indians represented by BIA
- Indian tribal venture
- limited liability company using a Social Security number.

26 Determining Payment Entity Ownership Share

A Introduction

Before amounts can be attributed to members of joint operations and entities, the payment entity ownership share must be computed for each member of the operation. This paragraph describes how the payment entity ownership share is computed.

B Determining Whether Organizational Structure Is Valid

As a condition of payment eligibility, each legal entity (joint operation or entity) applying for program benefits must provide the name and TIN of each member with an ownership interest. Failure to provide a TIN for each member in the farming operation will result in the entire payment entity being ineligible for payment.

- *--Once the member information has been collected on CCC-901 or CCC-902, as applicable, County Offices shall record the member data in the:
 - joint operation or entity file according to 2-PL
 - Business File System according to 3-PL (Rev. 1).--*

Reminder:

The joint operation/entity file data must be uploaded to the mainframe to be accessible to web-based payment systems. The upload process may take up to 14 calendar days to upload and process. See paragraph 16 for additional information.

26 Determining Payment Entity Ownership Share (Continued)

C Computing Member Ownership Interest

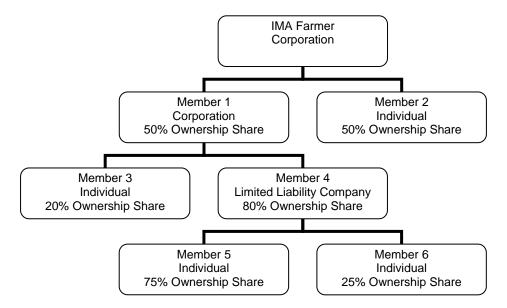

If all the direct members of the joint operation or entity are individuals, then the ownership *--interest is equivalent to the actual share recorded in the Business File System and/or joint--* operation/entity file on the System 36. However, if 1 or more of the direct members is another joint operation or entity, then the members' ownership share must be computed.

Member ownership shares are computed by multiplying the following:

- share of the embedded entity, times
- direct (actual) share of the member of the embedded entity.

This calculation may need to be repeated if there are multiple embedded entities in the organizational structure.

Example: IMA Farmer is a corporation with the following organizational structure.

In this example, the following is applicable:

- Members 1 and 2 have a direct (actual) share in IMA Farmer Corporation of 50 percent each
- Members 3 and 4 have a direct (actual) share in Member 1 of 20 percent and 80 percent respectively
- Members 5 and 6 have a direct (actual) share in Member 4 of 75 percent and 25 percent respectively.

26 Determining Payment Entity Ownership Share (Continued)

C Computing Member Ownership Interest (Continued)

The payment entity ownership shares are determined for the members of IMA Farmer Corporation as follows.

Member Level	Member	Payment Entity Ownership Share	Computation
1	1	50 percent	Actual share as recorded in the joint operation or entity file.
	2	50 percent	
2	3	10 percent	 50 percent member ownership share of Member 1, times 20 percent member ownership share.
	4	40 percent	 50 percent member ownership share of Member 1, times 80 percent member ownership share.
3	5	30 percent	 50 percent member ownership share of Member 1, times 80 percent member ownership share of Member 4, times 75 percent member ownership share.
	6	10 percent	 50 percent member ownership share of Member 1, times 80 percent member ownership share of Member 4, times 25 percent member ownership share.

Assuming all other eligibility requirements are met, payment amounts will be attributed to each member of IMA Farmer Corporation based on the payment entity ownership share computed in this table.

27 Three Member Level Rule

A Statutory Requirements

The Food, Conservation, and Energy Act of 2008 provides that attribution of payments made to legal entities shall be traced through 4 levels of ownership. The levels are defined according to this table.

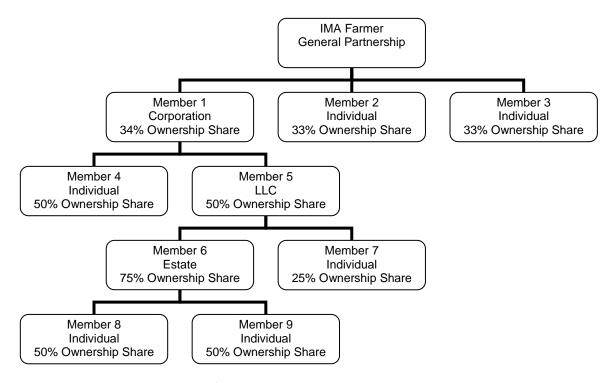

Statutory Level	Description as Recorded in the Joint Operation/Entity File		
1 st	Payment entity requesting the program benefit or payment.		
$2^{\rm nd}$	1 st level (direct) member of the joint operation or entity.		
3 rd	2 nd level member of the joint operation or entity.		
	Note: This is also the direct member of the 1 st level joint operation or entity.		
4 th	3 rd level member of the joint operation or entity.		
	Note: This is also the direct member of the 2 nd level joint operation or entity.		

^{*--}The Business File System and joint operation and entity files on the System 36 allow entry of more than 3 member levels; however, if the 3rd member level (4th statutory level) of a joint--* operation or entity is not any of the following business types, then the payment will be reduced by that member's payment entity ownership share:

- individual
- revocable trust using a Social Security number
- church, charity, or non-profit organization
- public school
- Indians represented by BIA
- Indian tribal venture
- limited liability company using a Social Security number.

B Example

IMA Farmer General Partnership is structured as follows.

In this example, Member 6 is a 3rd level member of IMA Farmer General Partnership and does not meet the three member level rule requirement because it is an estate. Therefore:

• the payment to IMA Farmer General Partnership will be reduced by 12.75 percent (payment entity ownership share) because of Member 6's ineligiblity

Note: The payment entity ownership share is computed by multiplying:

- 34 percent ownership share for Member 1, times
- 50 percent ownership share for Member 4, times
- 75 percent ownership share for Member 6.
- a reduction will be recorded by the system for Member 6 indicating they do not meet the three member level rule
- amounts will not be attributed to Member 8 and Member 9.

A Introduction

The attribution share is the share used to determine the following:

- payment amount that should be attributed to eligible members of joint operations and entities
- effective payment limitation for payment entities and members.

B Determining Attribution Share

Multiple factors affect how the attribution share is computed and depend on which rules are applicable to the specific program. Factors include the following:

- permitted entity eligibility
- AGI eligibility
- foreign person eligibility
- member contribution eligibility
- substantive change eligibility
- 3 member level eligibility.

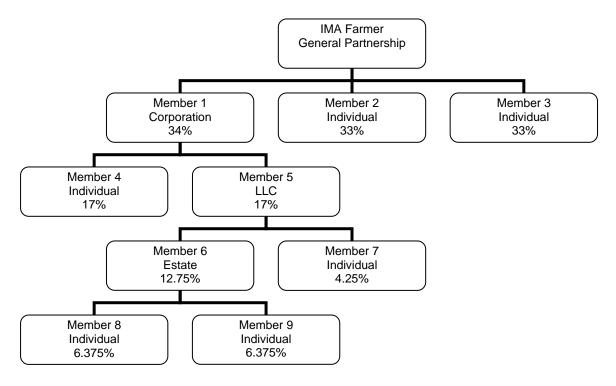

The attribution share is applied at the lowest member level and then the shares for eligible members are accumulated to the entity or joint operation level. If there are embedded entities, the eligible member shares are first accumulated to the embedded entity then accumulated up to the payment entity.

The attribution share is also affected by the rules applicable to the program. For example, member contribution only applies to DCP, so an ineligible member contribution for a member would not affect the attribution share for a program such as SURE.

C Example of Attribution Shares

The following is the organizational structure for IMA Farmer General Partnership and is the basis for the following examples.

Note: The shares reflected for each member are the payment entity ownership shares. See paragraph 26 for additional information.

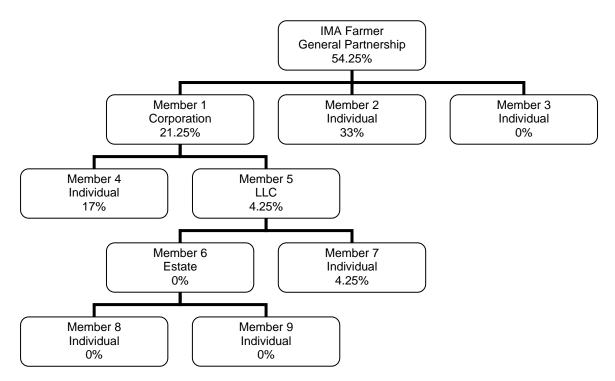

D Example 1

IMA Farmer General Partnership has applied for 2010 DCP payments.

- Permitted entity rules are not applicable to 2010 DCP payments.
- Member 3 does not meet AGI provisions.
- All members meet foreign person provisions.
- All members meet member contribution provisions.
- All members meet substantive change provisions.
- Member 6 is a 3rd level member that is not an individual.

The attribution shares are determined as follows.

In this example, each ineligible member's attribution share is set to 0 percent. The shares are then accumulated from the lowest member level up to the payment entity.

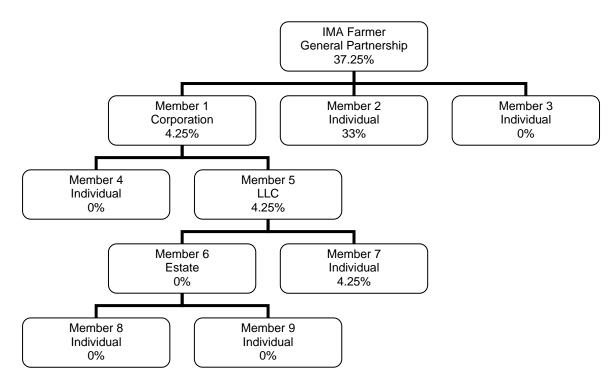

IMA Farmer is only eligible to receive 54.25 percent of the calculated payment before payment limitation is applied to the members of the joint operation.

E Example 2

IMA Farmer General Partnership has applied for 2010 DCP payments.

- Permitted entity rules are not applicable to 2010 DCP payments.
- Member 3 does not meet AGI provisions.
- All members meet foreign person provisions.
- Member 4 does not meet member contribution provisions.
- All members meet substantive change provisions.
- Member 6 is a 3rd level member that is not an individual.

The attribution shares are determined as follows.

In this example, each ineligible member's attribution share is set to 0 percent. The shares are then accumulated from the lowest member level up to the payment entity.

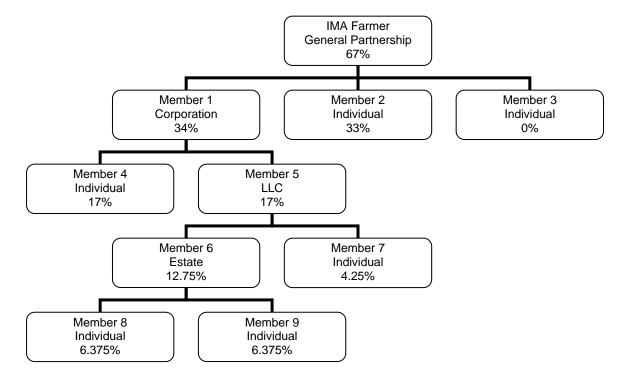

IMA Farmer is only eligible to receive 37.25 percent of the calculated payment before payment limitation is applied to the members of the joint operation.

F Example 3

IMA Farmer General Partnership has applied for a 2008 SURE payment.

- Permitted entity rules are not applicable to 2008 SURE payments.
- Member 3 does not meet AGI provisions.
- Foreign person provisions are not applicable to 2008 SURE payments.
- Member contribution provisions are not applicable to 2008 SURE payments.
- All members meet substantive change provisions.
- Member 6 is a 3rd level member that is not an individual.
- Three member level rule does not apply to programs administered under "person" provisions, and therefore, is not applicable to 2008 SURE payments.

The attribution shares are determined as follows.

In this example, each ineligible member's attribution share is set to 0 percent. The shares are then accumulated from the lowest member level up to the payment entity.

IMA Farmer is eligible to receive 67 percent of the calculated payment before payment limitation is applied to the members of the joint operation.

29 Controlling Payment Limitation

A Introduction

Under direct attribution provisions, payment limitation must be controlled at all levels of the organizational structure for the payment entity and all members.

B Applicability to Joint Operations

Payment limitation is not applicable to joint operations. Payment limitation is controlled for the members of the joint operation.

C Applicability to Entities

Payment limitation is applicable to:

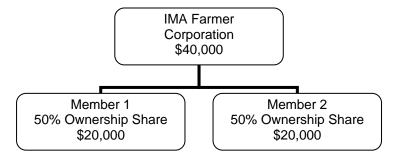

- the payment entity
- each member of the entity down to the lowest applicable member level.

Once the payment eligibility process has been completed, the system will determine the payment amount that can be issued because of payment limitation. Payment limitation is controlled through a bottom-up approach whereby the payment limitation rules are applied from the member levels up to the payment entity level.

Exception:

If the calculated payment exceeds the applicable program payment limitation, an initial reduction will be applied at the payment entity level before amounts are attributed to the members of the entity.

Example: IMA Farmer is a corporation earning a \$60,000 DCP-Direct payment. There are 2 members, each with a 50 percent ownership interest. Assuming all eligibility requirements are met, the payment will be attributed to the members as follows.

An initial payment limitation reduction of \$20,000 will be applied to IMA Farmer Corporation because the program payment limitation for DCP-Direct is \$40,000.

See paragraph 15 for additional information on payment limitation.

30-34 (**Reserved**)

35 Overview

A Background

As part of the modernization efforts of FSA to move applications to the web-based environment, and to implement the statutory mandate of direct attribution provisions, a common payment system has been developed for all FSA programs to use for issuing program benefits and payments to participating producers.

The concept of the common payment system is to apply a standardized process that runs in the same manner each time a payment is processed, but designed with enough flexibility to apply the specific program rules applicable to a program.

B Using the Common Payment System

The common payment process was deployed initially to accommodate issuing 2009 DCP-direct, 2009 ACRE-direct final payments, and 2009 CRP annual rental payments.

The following programs are currently using, or will be when deployed, the Common Payment System.

*__

Production Adjustment	Disaster	Price Support	Conservation
ACRE	ELAP	RTCP	BCAP
DCP	LFP	TAAF	CRP
	LIP		ECP
	NAP		EFCRP
	SURE		GRP
	TAP		TIP

__*

As additional payment applications are moved to the web-based environment, it is anticipated they will be developed to use the common payment process.

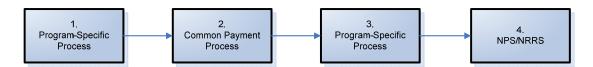

The remainder of this part describes the common payment process in greater detail.

36 Common Payment Process Concept

A High-Level Description of the Payment Process

In the past, each payment system was developed independently and built to apply the specific rules applicable to the program. Where possible, some of the same functionality was re-used, but each system was generally a stand-alone system.

Each program is still required to handle rules applicable to the program, but the common payment process now standardizes many of the processes required for processing a payment. The following is a high-level overview of the payment system.

The following is a general description of what actions are performed in each of the major processes.

Step	System	Action	
1	Program-Specific Process	 Calculates the payment based on the rules for the specific program. Determines when the payment is triggered for processing. Determines which payment eligibility rules are applicable to the program. Sends data into the common payment process. 	
2	Common Payment Process	 Attributes amounts to members of entities and joint operations. Reduces the attribution amount if the payment entity or members, as applicable, does not meet the payment eligibility rules for the program. Controls payment limitation. Sends the eligible payment or overpayment amount back to the program- 	
3	Program-Specific Process	 specific system for further processing. Handles any final actions required by the program. Example: DCP processes payment amounts by farm, producer, and crop. However, only one amount is sent to NPS by farm and crop. The program-specific process accumulates the payment amount to the farm level, by producer, before transferring the payment data to NPS. **Sends payable to NPS or the Pending Overpayment Report, as applicable* 	
4	NPS/NRRS	Facilitates the disbursement of the payable or administration of receivables.	

36 Common Payment Process Concept (Continued)

B Flexibility of Applying Program Rules

Many of the programs administered by FSA have different program rules. These include, but are not limited to, the following:

- "person" rules versus direct attribution rules
- AGI has 4 different income thresholds with at least one specifically targeted to certain types of payments, such as direct AGI only applies to DCP and ACRE direct payments
- payment eligibility. Most programs require the producer to meet AD-1026 and conservation compliance provisions, but "actively engaged in farming", cash rent tenant, delinquent debt, etc. are only applicable to certain programs.

The common payment process has been designed to accommodate all of the program rules that may be applicable to the program. The program-specific process determines which rules apply and sends that data into the common payment process.

Example: CRP contracts approved before October 1, 2008, fall under "person" rules. An indicator is sent to the common payment process specifying "person" rules apply. Payment amounts are then attributed to members of entities and joint operations, however payment limitation is only controlled for the payment entity and members of joint operations following "person" rules.

Whereas, DCP-direct payments fall under direct attribution rules. Payment amounts are attributed to members of entities and joint operations, but payment limitation is controlled for the payment entity and all members, not just members of joint operations.

Regardless of the rules that apply to the program, the common payment process has the flexibility to handle the many different combinations of rules that apply to FSA programs.

A Initiating the Payment Process

Each program may have different rules for initiating the payment process. These requirements may be based on statutory mandates or regulatory provisions outlining the administration of the program.

The "trigger" is something that causes the payment process to initiate. Once initiated, each payment triggered runs through the payment process to determine whether a payment is due the producer or if the producer is overpaid. The following are a list of possible triggers that may initiate the payment process.

Trigger	Description	
Approval of	For many programs, the producer is eligible to receive payment immediately upon	
Contract or	approval of contract or application.	
Application		
Date	Payments for many programs are not issued until a specific date is reached, such as:	
	 October 1 for CRP annual rental payments and DCP/ACRE-direct final payments 1st day of the month for a producer requesting a DCP/ACRE-direct advance 	
	payment.	
Publication of	In some cases, producers may have applied for the program and the contract or	
Regulations	application is approved, but the payments cannot be issued until the regulations governing the program are published.	
Announcement of Payment Rate	Payments such as DCP counter-cyclical cannot be issued until a payment rate is determined.	
Update to a	Updates to any of the systems used to support a payment will automatically retrigger	
Supporting System	the payment to process. These include, but are not limited to, the following:	
	• SCIMS	
	Eligibility System	
	Combined Producer System	
	Payment Limitation System	
	Joint Operation/Entity Files	
	Compliance System, including acreage reporting data and reductions due to the planting of fruit and vegetables	
	contract or application, including systems that could affect the contract/application such as Farm Records Management System	
	other systems applicable to the program.	
User Initiated	Users can initiate a payment in the following ways:	
	• some programs, such as CRP, may have an option to trigger the payment	
	• selection from the nonpayment report for programs that use common payment reports. See paragraph 66.	

B Caution Required for Updating System Data

As described in subparagraph A, the common payment process is a fully integrated system that uses data from many systems. A change in one system could cause improper payments to be issued or receivables to be established for all payments that have been issued to the producer.

County Offices shall be extra cautious when updating the system to ensure that the action being taken properly reflects the certifications and determinations that are on file in the County Office.

C Forcing Payments to Process

Under no circumstance shall County Offices attempt to force a payment to process by manipulating data in the system. Examples include, but are not limited to, the following situations.

- Changing an eligibility certification or determination to a value of something other than what is applicable based on the documentation filed by the producer or the determination completed by COC.
- Entering or removing an approval date on a contract or application to trigger a payment.
- Deleting joint operation/entity file data to try to trigger a payment.

If changes are made properly in each of the supporting systems, the common payment process will function in the proper manner unless there is a problem that needs to be corrected in the software. If there are questions related to whether a payment or receivable has been issued properly:

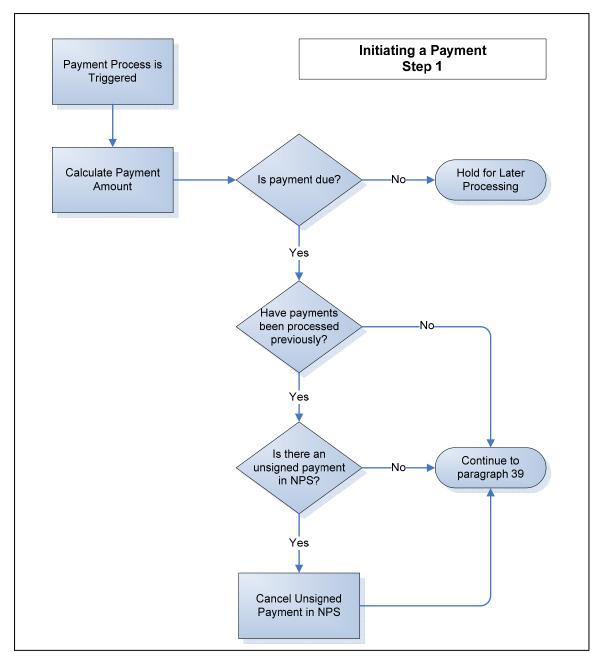

- County Offices shall contact the State Office program specialist for the applicable program
- State Offices shall contact the National Office program specialist for the applicable program if additional guidance is needed after reviewing the situation.

A Introduction

Once a payment is triggered, the payment is sent through the common payment process in the same manner each time a payment runs. This paragraph describes the initial steps of the common payment process.

B Flow Chart

This flow chart describes the initial steps in the common payment process that occur regardless of whether the payment entity is an individual, joint operation, or entity.

C Description of Each Process

This table provides additional information about each of the steps in the flowchart in subparagraph B.

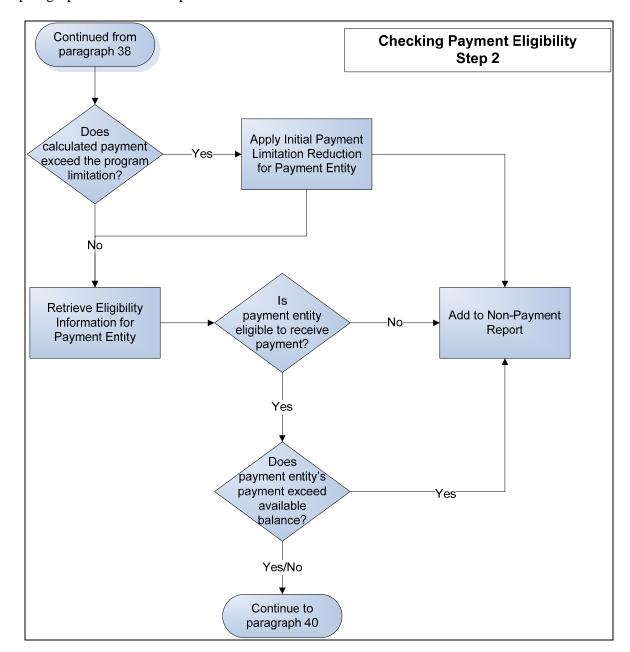

Flow Chart Step			Description	
Payment Process is	The initial action that causes the payment process to be initiated. See paragraph 37 for additional			
Triggered	information on payment triggers.			
Calculate Payment			sed on information recorded on the contract or application. This is

			system continues the payment process to determine whether	
			the producer was under or overpaid. See paragraph 39.	
			ine producer was under or overpaid. See paragraph 37.	

A Introduction

The 2nd stage in the common payment process is to determine payment eligibility. The process differs between individuals and joint operations/entities because of the requirement to check eligibility for members of entities/joint operations. This paragraph identifies each of these processes separately.

B Flow Chart for Individuals and Entities Without Members

This flow chart describes the steps for checking payment eligibility in the common payment process that occur for payment entities that are individuals or entities without members. See paragraph 13 for a description of entities without members.

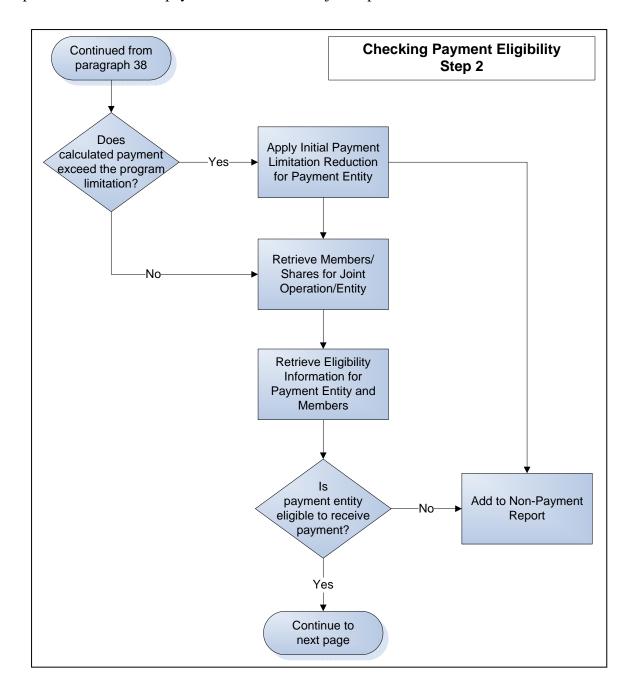

C Description of Each Process for Individuals and Entities Without Members

This table provides additional information about each of the steps in the flow chart in subparagraph B.

		Overpayment Report, as applicable. See paragraph 40.	

A Introduction

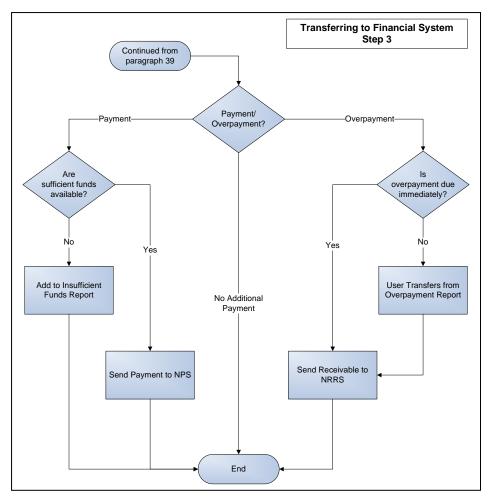

After the amount that can be paid to the payment entity has been determined, the result could be any of the following:

- payment due the payment entity
- overpayment based on a condition updated after a payment was issued
- no additional payment or overpayment if the condition that retriggered the payment to process did not affect the calculated payment.

The last stage in the payment process is to transfer information to the applicable financial system. This paragraph describes the steps for transferring information to NPS or NRRS.

B Flow Chart

This flow chart describes the initial steps in the common payment process that occur regardless of whether the payment entity is an individual, joint operation, or entity.

40 Transferring Information to NPS or NRRS (Continued)

C Description of Process for Transferring Information to NPS

This table provides additional information about each of the steps in the flow chart in subparagraph B when a payment is due the producer.

Flow Chart Step		Description		
Payment/ Overpayment?	Once the attribution process has completed and payment limitation has been controlled, the system determines whether the current payment transaction has resulted in a payment due, an overpayment, or no additional payment/overpayment.			
	If the amount determined is	THEN		
	greater than \$0	 amounts are accumulated to the farm, contract, or application level so 1 payment is payable to the payment entity if amounts are calculated by crop, such as DCP the producer is due a payment and the amount is sent to NPS. 		
	negative	see subparagraph D.		
	\$0	see subparagraph E.		
Are sufficient funds available?	If the program is controlled through the e-funds process, the system checks to determine whether sufficient funds are available for the county to issue the payment.			
	IF sufficient funds are	sufficient funds are THEN the payment		
	available	is sent to NPS for certification and signature.		
	not available	information is added to the insufficient funds report. See paragraph 67 for additional information.		

D Description of Process for Transferring Information to NRRS

This table provides additional information about each of the steps in the flow chart in subparagraph B when an overpayment is computed for the producer.

Flow Chart Step	Description		
Payment/	Once the attribution process has completed and payment limitation has been controlled, the system		
Overpayment?	determines whether the current payme	ent transaction has resulted in a payment due, an overpayment,	
	or no additional payment/overpaymer	nt.	
	If the amount determined is	THEN	
	greater than \$0	see subparagraph C.	
	negative	the payment entity is overpaid.	
	\$0	see subparagraph E.	
Is overpayment	*Overpayments are updated to the F	Pending Overpayment Report.	
due immediately?	If the overpayment	THEN the	
	requires corrective action	applicable corrective action should be completed immediately.	
	is determined to be a legitimate debt	overpayment should be selected and transferred immediately to NRRS according to subparagraph 65 C.	
	is due at a later date	overpayment amount will be listed on the Pending Overpayment Report for verification by the County Office. If	
	Note: An example of this is an advance DCP direct overpayment determined during the advance	the overpayment is listed erroneously, County Offices shall take corrective action to resolve the situation that caused the overpayment.	
	payment cycle. The overpayment may not be due until final payments*	See paragraph 65 for additional information.	

40 Transferring Information to NPS or NRRS (Continued)

E Description of Process if Payment Data Has Not Changed

This table provides additional information about each of the steps in the flow chart in subparagraph B when:

- no payment was earned by the payment entity
- action that caused the payment to be reprocessed did not result in an additional payment or overpayment.

Flow Chart Step	Description		
Payment/	Once the attribution process has completed and payment limitation		
Overpayment?	has been controlled, the system determines whether the current		
	payment transaction has resu	lted in a payment due, an	
	overpayment, or no additional payment/overpayment.		
	If the amount determined		
	is THEN		
	greater than \$0 see subparagraph C.		
	negative see subparagraph D.		
	\$0 the process terminates without		
	*sending information to NPS or the		
		Pending Overpayment Report*

Part 5 Common Reports System

Section 1 Basic System Information

51 Overview

A Concept of Common Report System

The Common Reports System provides a central location for reports for program payments processed through the common payment system.

Historically, FSA payment systems have functioned somewhat independently because different rules apply to different programs. As a result, there was not always consistency in how reports were developed to assist users. The concept of the Common Reports System is to provide users with a standardized set of reports that can be used to assist with payment reconciliation issues. The benefits of the Common Reports System include:

- reports generated through this process have the same format regardless of the program for which the report is generated
- once the user uses the reports for 1 program, they gain a knowledge of how to reconcile payment issues for other programs
- when a new program is implemented, software development effort is not needed to generate reports.

B Programs Using the Common Reports System

The following programs use the Common Reports System.

Program Area	Program - Program Type	Years
Conservation	CRP	*2013 and future
	TIP	2012 – 2014
Disaster Assistance	ELAP	2010 and future
	LFP	2008 and future
	LIP	2008 and future*
	NAP	2011 and future
	NAP-LAC (LA Compensation)	2012 and future
	NAP-TVL (LA Travel)	2012 and future
	SURE	2008 and future
	TAP	*2008 and future*
Price Support	ce Support RTCP	
	TAAF	2008 and future
Production Adjustment ACRE-ACRE		*2009 – 2012
·	ACRE - Direct	2009 – 2013
	DCP - Counter-Cyclical	2009 – 2010
	DCP - Direct	2009 – 2013*

Note: It is anticipated that other web-based payment systems will use the Common Report System, however specific information on those programs is not available. This table will be updated as new programs are added to the process.

51 Overview (Continued)

C Common Payment Reports

The reports developed through the Common Payment Reporting System are broken down into 2 categories depending on whether data for the report is available in "real time" or delayed.

The following reports include "real time" data:

- Estimated Calculated Payment Report, if applicable to the program
- •*--Prepayment Report
- Submitted Payments Report
- Submitted Overpayments Report
- Pending Overpayment Summary Report--*
- Pending Overpayment Report
- Insufficient Funds Report
- Payments Computed to Zero Report.

The following reports include data from a reporting database that is updated within 24 hours:

- Nonpayment/Reduction Report
- Payment History Report Summary
- Payment History Report Detail.

Note: The reporting database is scheduled to update daily at 4 a.m. c.t. However, the last update date is listed on the Common Reports Menu for user information.

A Accessing the Common Payment Reports System

To access the Common Payment Reports system, go to FSA's Applications Intranet web site at http://intranet.fsa.usda.gov/fsa/FSAIntranet_applications.html. Under "Common Applications", CLICK "Common Payment Reports System".

Notes: Internet Explorer shall be used when accessing the Common Payment Reports System. Users will be prompted to login through the USDA eAuthentication Login Screen. On the USDA eAuthentication Login Screen, users **must**:

- enter eAuthentication user ID
- enter eAuthentication password
- CLICK "Login".

The home page for the Common Payment Reports will be displayed.

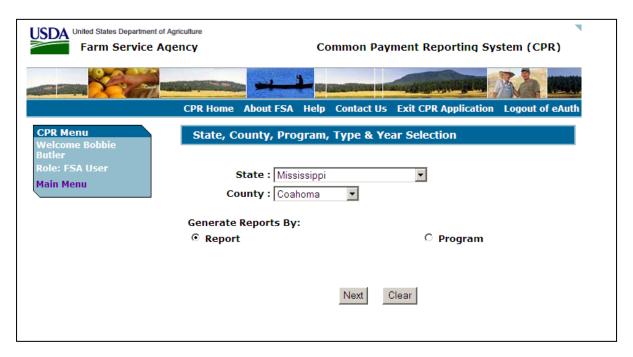

B Authorized Access

The Common Payment Reports System is for internal FSA use only and will not be made available to the public or other Agency users. This table describes the level of access that has been provided to FSA users.

Type of User	Authorized Capabilities
County Office	Read access to all reports for any producer nationwide.
	Ability to process payments from the Nonpayment/Reduction Report, if the user is associated with the county where the payment is administered.
	Ability to transfer overpayments to NRRS, if the user is associated with the county where overpayment occurred.
State Office	Read access to all reports for any producer nationwide.
National Office	

A Example of Common Payment Reports Home Page

Following is an example of the Common Payment Reports Home Page.

B Selecting State and County

After successfully entering user ID and password, the Common Payments Reports System Home Page is displayed. The State and county will be defaulted based on information applicable to the user's eAuthentication login ID.

This table describes how the "State" and "county" fields are defaulted.

Field	User	Default
State	County Office	Name of the State associated with the user.
	State Office	
County	County Office	Name of the county the user is associated with. If the user is associated with more than one county, the system will default to the county with the lowest county code.
	State Office	Name of the first county in the State associated with
		the user.

C Initiating the Report Selection Process

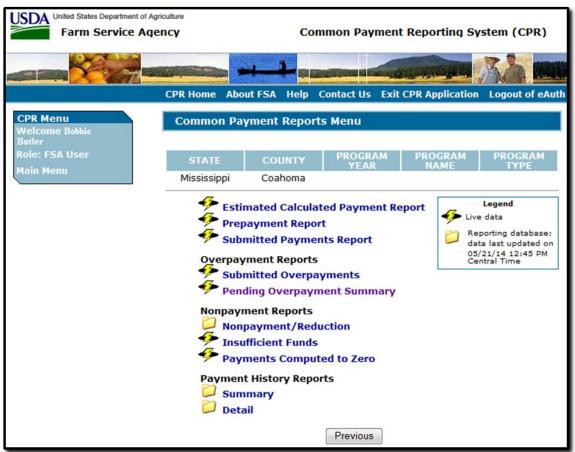

Follow instructions in this table to initiate the report selection process from the Common Payment Reports Home Page.

Step	Ac	ction	Result
1	If the defaulted State and cou		
	report to be generated, then s		
	the drop-down list.		
2	There are 2 options to naviga		
	screen based on the preference		
	IF the user wishes to		
	access	THEN select	
	the same report for multiple	"Report" and CLICK "Next".	Options will be
	programs		displayed to select the
			applicable program.
			Go to step 3.
	all reports for an applicable	"Program" and CLICK	The Common
	program	"Next".	Payment Reports
			Menu will be
			displayed.
3		provided, select the following	The Common
	and CLICK "Next":		Payment Reports
			Menu will be
	Program		displayed.
	Program Year		
	Program Type.		

A Example of Common Payment Reports Menu

Following is an example of the Common Payment Reports Menu.

*__

Note: The reports displayed on the Common Payment Reports Menu may vary depending on the selection for accessing the Common Payment Reports Menu and whether payments are being processed for the selected year, program, and program type.

B Page Information/Options

The following options are available on the Common Payment Reports Menu.

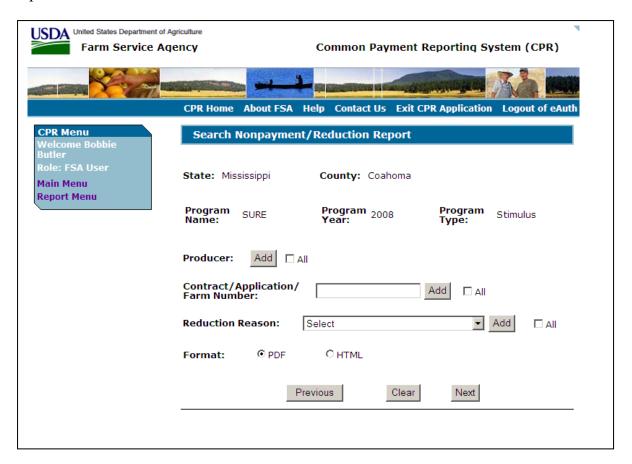

Option	Action
State	Displays the State and county selected on the Common Payment
County	Reports Home Page.
Program Year	Displays the selected program year, program name, and program type,
Program Name	if the "program" option was selected on the Common Payment Reports
Program Type	Home Page.
Report	Allows the user to select the report to be generated. Click on the report
	name and the search criteria page will be displayed. See paragraph 55.
Previous	Returns to the Common Payment Reports System Home Page.

A Example of Common Payment Reports Menu

The Search Criteria Page provides standardized options for generating report information; however, some search options are only available for certain reports.

Example: The option to generate a report based on the reason the payment was not issued is only applicable to the Nonpayment/Reduction Report.

The following is an example of the Search Criteria Page for the Nonpayment/Reduction Report. See subparagraph B for a list of all options that are available on this page for all reports.

B Page Information/Options

All reports are limited to the specific State, county, and program initially. The Search Criteria Page narrows down the information that will be displayed on a selected report.

Notes: Users are allowed to select multiple search criteria options, where applicable.

State level reports are **not** available through this process.

The following options are available on the Search Criteria Page.

Type of			.			
Search	Description					
Date Range	Allows the user to specify a beginning and ending date for the selected report. If the user selects this option, then:					
	_	-	must be entered not required.			
	Note: If no e	nding o	late is entered, then the end	ding date is the current date.

Section 2 Common Payment Reports

61 General Report Information

A Overview

This section provides detailed information about the reports provided through the Common Payment Report process.

The following reports are available through the Common Payment Reports System:

- Estimated Calculated Payment Report
- Prepayment Report
- *--Note: When applicable to the year and program.--*
- Submitted Payments Report
- Overpayment Reports:
 - Submitted Overpayments Report
 - •*--Pending Overpayment Summary Report--*
 - Pending Overpayment Report
- Nonpayment Reports:
 - Nonpayment/Reduction Report
 - Insufficient Funds Report
 - Payments Computed to Zero Report
- Payment History Reports:
 - Payment History Report Summary
 - Payment History Report Detail.

General Report Information (Continued)

B Report Header Information

Each report includes header information that is consistent for all reports. This table describes the report header information.

Field	Description
State	Full name for the State selected by the user.
County	Full name for the county selected by the user.
Program Year	Program year selected by the user.
Program Name	Full program name and program type selected by the user.
Report Name	The name of the report.
Date	Date the report is generated by the user.
Page Number	Page number for the report.
Date Range	If the user selected the search criteria by date range, the selected date
	range is displayed/printed.

C Multiple IE Windows

Reports are opened in a new Internet Explorer window regardless of the "pdf" or "html" option is selected. Users shall close the window for an existing report before generating a new report.

Estimated Calculated Payment Report

A Description of Report

Estimated calculated payment reports are program-specific and some programs do not have this report. Users can access the Estimated Calculated Payment Report through the Common Payment Reports System, but information about each report is not included in this handbook.

Refer to the applicable program handbook for a description of the information on the Estimated Calculated Payment Report.

63 Submitted Payments Report

A Description of Report

The Submitted Payments Report provides a report of the transactions that have been sent to NPS based on the selected search criteria.

Note: Producers listed on the Submitted Payments Report will remain on the report indefinitely.

Example: User would like a report of all transactions sent to NPS on June 1, 2010. Users would specify June 1, 2010, as the beginning and ending dates then generate the report.

All payments sent to NPS for the selected State, county, and program will be listed on the report.

B Availability of Data

The information displayed on the report includes "real time" data.

C Information Provided on the Report

Since this report includes information submitted to NPS, this report only includes the payment entity name. Data attributed to members of joint operations and entities is not listed on the report.

--The following information is provided on the Submitted Payments Report.--

Field	Description				
Date	Date the payment transaction was processed and sent to NPS.				
Producer Name	Payment entity's name from SCIMS according to the following.				
	For Name Displayed/Printed				
	Individuals	Last name, first name, middle name, and suffix			
	Businesses	Business name			
Payment ID Number	Unique number that ties the program history data to the NPS history data.				
Business Type	Numeric business type for the selected customer.				
Contract/ Application/Farm	Contract, application, or farm number that is associated with the payment transaction. Note: If the selected program does not have a contract, application, or farm				
Payment Reduced	number, this field will be blank. Indicates whether any portion of the payment was reduced. The reduction could apply for the payment entity or a member if the payment entity is a joint operation or entity.				
	Note: Refer to the No the payment wa	npayment/Reduction Report to determine the reason as reduced.			
Amount Submitted	Amount submitted to N	IPS for the payment entity.			

63 Submitted Payments Report (Continued)

D Sort Order

The information on the report is sorted as follows:

- transaction date
- producer name.

E Example of Report

The following is an example of a Submitted Payments Report.

Coahoma Mississippi	United States Department of Agriculture Farm Service Agency					Date: 06/29/2010 Page: 1	
	2008 Supplemental Agricultural Disaster Assistance - Stimulus Submitted Payment Report						
				Contract/			
Date	Producer Name	Payment ID Number	Business Type	Application/ Farm	Payment Reduced	Amoun Submitted

11/13/2009					Yes	\$ 924	
11/13/2009 11/13/2009	General Partnership 1	7532832	02		100		

Submitted Overpayments Report

A Description of Report

The Submitted Overpayments Report provides a report of the transactions that have been sent to NRRS based on the selected search criteria.

Note: Producers listed on the Submitted Overpayments Report will remain on the report indefinitely.

Example: User would like a report of all transactions sent to NRRS on June 1. Users specify June 1 as the beginning and ending dates then generate the report.

All overpayments sent to NRRS for the selected State, county, and program will be listed on the report.

B Availability of Data

The information displayed on the report includes "real time" data.

C Information Provided on the Report

Since this report includes information submitted to NRRS, this report only includes the payment entity name. Overpayments for members of joint operations and entities are not listed on the report.

--The following information is provided on the Submitted Overpayments Report.--

Field	Description		
Date	Date the overpayment transaction was processed and sent to NRRS.		
Producer Name	Payment entity's name	from SCIMS according to the following.	
	For	Name Displayed/Printed	
	Individuals	Last name, first name, middle name, and suffix	
	Businesses	Business name	
Payment ID Number	Unique number that ties	s the program history data to the NRRS history data.	
Business Type	Numeric business type	for the selected customer.	
Contract/	Contract, application, o	r farm number that is associated with the overpayment	
Application/Farm	transaction.		
	Note: If the selected program does not have a contract, application, or farm number, this field will be blank.		
Debt Basis	3-digit debt basis code sent to NRRS to represent the reason for the debt. See *64-FI for additional information*		
Payment Reduced	Indicates whether any portion of the payment was reduced. The reduction could apply for the payment entity or a member if the payment entity is a joint operation or entity. Note: See the Nonpayment/Reduction Report to determine the reason the		
	payment was re		
Amount Submitted	Amount submitted to NRRS for the payment entity.		

Submitted Overpayments Report (Continued)

D Sort Order

The information on the report is sorted as follows:

- transaction date
- producer name.

*--64.5 Pending Overpayment Summary Report

A Description of the Report

The Pending Overpayment Summary Report will provide a list of years and programs/ program types that have overpayments listed on the Pending Overpayment Report. The Pending Overpayment Summary Report will provide access to the Pending Overpayment Report.

Notes: Regardless of how the Common Payment Reports Menu was accessed (by report or program), the Pending Overpayment Summary Report will list **all** years and **all** programs/program types for the selected State and county that have at least 1 producer listed on a Pending Overpayment Report.

Users will no longer have to access each year and program separately to determine whether producers are listed on the Pending Overpayment Report.

B Availability of Data

The information displayed on the report includes "real time" data.

C Information Provided on the Report

This report includes a list of years, programs, and program types, when applicable, that have at least 1 producer listed on the Pending Overpayment Report.

Note: If the State and county selected do **not** have any pending overpayments, then the Search Pending Overpayment Summary Report Screen will display the message, "No Results Based on Selection Criteria".

The following information is provided on the Pending Overpayment Summary Report.

Field	Description
Year	The year, program, and program type, if applicable, of the Pending
Program	Overpayment Report with at least 1 overpayment listed.
Program Type	

--*

*--64.5 Pending Overpayment Summary Report (Continued)

C Information Provided on the Report (Continued)

The following information is provided on the Pending Overpayment Summary Report.

Button	Action/Result
Year	Select the year associated to the year, program, and program type to display the Pending Overpayment Report.
	See paragraph 65 for information about the Pending Overpayment Report.

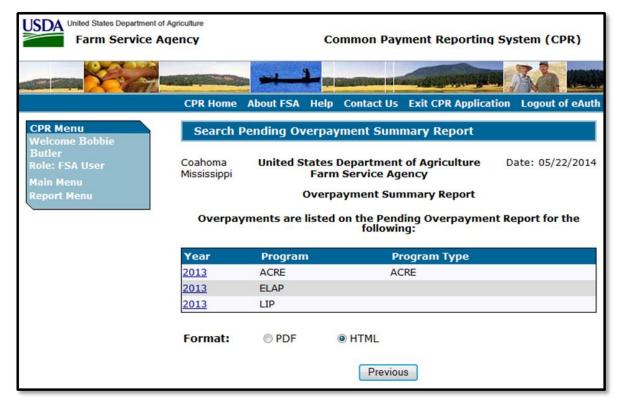

D Sort Order

The information on the report is sorted as follows:

- year
- program
- program type.

E Example of Pending Overpayment Summary Report

Following is an example of the Pending Overpayment Summary Report.

65 Pending Overpayment Report

A Description of Report

The Pending Overpayment Report provides a report of the transactions that have been *--computed as overpayments, but have not been transferred to NRRS. The Pending Overpayment Report is accessed through the Pending Overpayment Summary Report. See paragraph 64.5 for information about the Pending Overpayment Summary Report.--*

Overpayments listed on the Pending Overpayment Report:

- will be removed from the report if corrective action is taken
- will be transferred to NRRS after 20 workdays * * *
- may be selected and transferred to NRRS immediately.

Notes: If the producer has both a DCP direct and CC overpayment, the CC overpayment will be identified **after** the DCP direct overpayment amount has been transferred to NRRS. This is to accommodate a payment calculation that involves FAV, even for producers not having FAV.

Overpayments determined because of a program "switch" between DCP and ACRE will be:

- transferred immediately and **not** be listed on the Pending Overpayment Report
- listed on the Submitted Overpayments Report only.

B Availability of Data

The information displayed on the report includes "real time" data.

C Actions for Overpayments Listed on the Pending Overpayment Report

Overpayments determined during the program payment calculation process are updated to the Pending Overpayment Report. Some overpayments are legitimate debts and should be immediately transferred to NRRS while other overpayments are based on erroneous information in the system.

The following provides the actions that can be taken for overpayments listed on the Pending Overpayment Report.

Description	Action		Result		
The overpayment	Correct the condition causing		The corrective action will trigger the payment		
listed on the	the overpayment to be listed.		process which will determine if the condition		
Pending			cau	ising the overpayment	has been resolved.

Overpayment					
Report on the					
"Transfer Date".					

D Information Provided on the Report

Since this report includes information that may be submitted to NRRS, this report **only** includes the payment entity name. Overpayments for members of joint operations and entities are **not** listed on the report.

D Information Provided on the Report (Continued)

The following information is provided on the Pending Overpayment Report.

Field	Description		
Overpayment Date	Date the overpayment was determined.		
Transfer Date	Date the overpayment will automatically be transferred to NRRS unless corrective action is taken by the County Office.		
	Notes: Overpayments will automatically be transferred to NRRS after 10 workdays.		
		vill be September 30 for overpayments determined	
		ogram's advance payment cycle.	
Producer Name	•	me from SCIMS according to the following.	
	For	Name Displayed/Printed	
	Individuals	Last name, first name, middle name, and suffix.	
	Businesses	Business name.	
Contract/	Contract, application	n, or farm number that is associated with the	
Application/Farm	overpayment transaction.		
	Note: If the selected program does not have a contract, application, or farm number, this field will be blank.		
Commodity	A commodity can be an agricultural crop, type of livestock, or other description as determined by a program. If payments are not calculated at a commodity level for the selected program, this field will be blank.		
	Note: Some commodities may be abbreviated because of space limitations on some reports. See Exhibit 10 for additional information on commodity codes used for some programs.		
Debt Basis	3-digit debt basis code sent to NRRS to represent the reason for the debt. See 64-FI for additional information.		
Overpayment Amount	Computed overpayment amount for the payment entity.		

See subparagraph 66 E for reasons that may be printed on the Pending Overpayment Report.

Notes: The Pending Overpayment Report only includes 1 reason that an overpayment was computed and the reason is summarized to the payment entity level. As such, the message listed may apply to a member of a joint operation or entity instead of the payment entity itself.

For joint operations and entities, County Offices shall review the message listed on the report, then verify that the system is updated properly for the payment entity and all members of the payment entity that are printed for each applicable reduction.

A future software release will associate the reason for the overpayment with the payment entity or member, as applicable. However, a projected software release date is not available.

--65 Pending Overpayment Report (Continued)--

E Sort Order

The information on the report is sorted as follows:

- transaction date
- producer name.

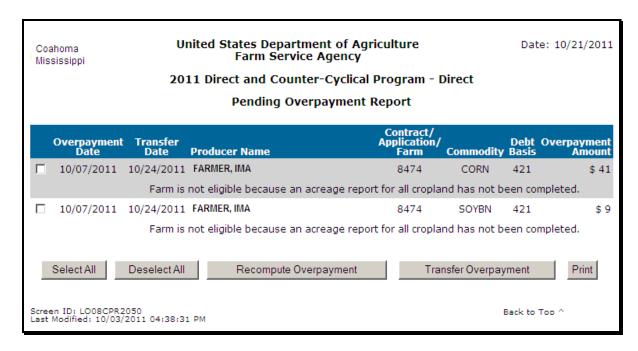

F Example of Report

The following is an example of the printable version of the Pending Overpayment Report.

The following is an example of the web page version of the Pending Overpayment Report.

Note: See subparagraph G for additional information on the options available on the Pending Overpayment Report.

G Options Available on the Pending Overpayment Report

The web page version (html) of the Pending Overpayment Report provides County Office users with various options for handling overpayment amounts that have been computed by the system. The following provides a description of the options available.

Option	Description		
Select All	Selects all overpayments listed so subsequent action can be taken,		
	such as reprocessing all overpayments.		
Deselect All	Deselects all records that have been selected.		
Recompute Overpayment	Recomputes overpayments for the selected producers. This option should be used if County Offices want to immediately verify that action taken for selected producers has corrected an erroneous overpayment condition.		
	Note: When updates are made in supporting systems, such as eligibility or SCIMS, those systems notify the Common Payment System that the payment should be recomputed. Generally notifications are processed on a nightly basis. As such, users do not have to reprocess the overpayments following corrective action, but this option is available if the user wants to verify that the action taken has resolved the situation causing the overpayment to be listed in error. Reminder: Updates that are made on the System 36, such as updates to the joint operation/entity file, still require an upload to the mainframe. As such, these updates will not be recognized when reprocessing until the upload		
Transfer	has occurred. Provides a manual option that allows users to immediately transfer the		
Overpayment	overpayment amount to NRRS for the selected producers. Legitimate debts payable to CCC shall be transferred to NRRS immediately upon verification that the producer is overpaid.		
	See paragraph 17 and/or the applicable program handbook for additional information on when overpayments should be manually transferred to NRRS.		
Print	Opens a new window with the printer-friendly (pdf) version of the report.		

66 Nonpayment/Reduction Report

A Description of Report

The Nonpayment/Reduction Report provides users with the reason a payment was not issued, in full or in part. This report is essentially a snapshot of the data that was used to process the payment/overpayment which can be used by State or County Office users to:

- verify the payments were processed correctly
- take corrective action if a payment was reduced improperly based on incorrect data recorded in the system.

B Availability of Data

The information displayed on the report **is not** "real time" data. Refer to the legend on the Common Payment Reports Menu to determine the date and time the data was last updated.

C Information Provided on the Report

This report includes information for nonpayment conditions, for the payment entity and/or any ineligible member that prevented the full contract/application-level payment from being sent to NPS.

The following information is provided on the Nonpayment/Reduction Report.

Field	Description			
* * * Name	The name of the paym	ent entity or member	whose attributed amount was	
			eration or entity with members, then	
			re was not an actual reduction	
	11	,	gible members are listed directly	
	below the payment en	tity.		
	The name printed is he	asad on the following	from CCIMC.	
	The name printed is based on the following from SCIMS:			
	• for individuals, last name, first name, middle name, and suffix			
	• for businesses, business name.			
	IF the payment AND a reduction THEN the following is printed on			
	entity is an	is applicable to	the report	
	 individual 		individual/entity's name is listed.	
			The reasons for the reduction is

Nonpayment/Reduction Report (Continued)

D Sort Order

The information on the report is sorted as follows:

- transaction date
- producer name.

E Nonpayment/Reduction Messages

There are 2 types of reductions that may apply:

- general eligibility reductions which may apply to more than 1 program, such as AGI compliance
- program-specific reductions which apply only to a specific program, such as FAV acre-for-acre reductions apply only to DCP and ACRE.

The following table identifies the general eligibility messages that may be listed on the Nonpayment/Reduction Report and the corrective action that may be taken to resolve the error, if applicable.

Notes: See Exhibit 4 for additional information on which payment eligibility rules apply to various programs.

The following messages are listed in alphabetical order.

Message on Nonpayment/Reduction Report	Description/Corrective Action
Calculated payment exceeds the applicable program payment limitation.	The application/contract-level payment amount exceeds the program payment limitation.
	Verify the application/contract data is recorded correctly. The February Colonies of Report can be used to determine
	 The Estimated Calculated Payment Report can be used to determine how the payment was computed if applicable to the program.

67 Insufficient Funds Report

A Description of Report

The Insufficient Funds Report provides a report of payments that could not be processed because sufficient funds are not available. There are 2 types of funds control processes.

• Some programs require funds to be obligated when the contract or application is approved for payment. Obligations are handled internally by the system and State and County Office users are not required to allocate funds in the Financial E-Funds system.

Examples:DCP-Direct and ACRE-Direct are examples of programs that require funds to be obligated.

TAP obligations must be allocated by State Office users once an application is approved.

• Other programs require funds to be allocated to the applicable State and county through the Financial E-Funds system before the payment can be sent to NPS.

Example: DCP Counter-Cyclical and SURE are examples of programs that require funds to be allocated.

--The Insufficient Funds Report will not display information for programs that have e-Funds maintained at the National level. The funding level should be sufficient to ensure that all program payments are processed.--

B Availability of Data

The information displayed on the report includes "real time" data.

C Information Provided on the Report

Since this report includes information that would be submitted to NPS if sufficient funds were available, this report only includes the payment entity name. Data attributed to members of joint operations and entities is not listed on the report.

C Information Provided on the Report (Continued)

The following information is provided on the Insufficient Funds Report.

Field		Description			
Date	Date the payment wa	Date the payment was calculated and was attempted to be sent to			
	NPS.				
Producer Name	Payment entity's nar	ne from SCIMS according to the following.			
	For	Name Displayed/Printed			
	Individuals	Last name, first name, middle name, and suffix			
	Businesses	Business name			
Business Type	Numeric business ty	pe for the applicable payment entity.			
Contract/	Contract, application	, or farm number that is associated with the			
Application/Farm	payment transaction.				
	Note: If the selected program does not have a contract, application, or				
	farm number, this field will be blank.				
Calculated Payment	Amount of the paym	ent that would have been sent to NPS if sufficient			
Amount	funds had been available.				
Total Insufficient	The accumulated total for all producers listed on the insufficient funds				
Funds	report included in the	report included in the selected search criteria. This total amount can			
	be used by the Natio	nal or State Office to determine the amount that			
	should be allocated t	o the applicable County Office.			

D Sort Order

The information on the report is sorted by payment entity name.

A Description of Report

The Payment Computed to Zero Report provides a report of payments that will not be processed because the calculated program payment amount is \$0 before any reductions or eligibility provisions are applied.

Example: IMA Farmer has 100 percent interest in 0.1 DCP oats base acres on FSN 1. Although the crop is enrolled, the calculated contract-level payment is less than 50 cents so the payment amount is \$0.

Note: The Nonpayment/Reduction Report may also include payments computed to \$0, but those are the result of a contract/application level payment that started out as greater than \$0 but has been reduced to \$0 due to an ineligibility condition of some kind.

B Availability of Data

The information displayed on the report includes "real time" data.

C Information Provided on the Report

Since this report includes contract/application level information and is never sent through the common payment process, this report only includes the payment entity name. Data attributed to members of joint operations and entities is not listed on the report.

The following information is provided on the Payment Computed to Zero Report.

Field		Description			
Date	Date the payment was calculated and was determined to be \$0.				
Producer Name	Payment entity's name	from SCIMS according to the following.			
	For	Name Displayed/Printed			
	Individuals	Last name, first name, middle name, and suffix			
	Businesses	Business name			
Business Type	Numeric business type	for the applicable payment entity.			
Contract/	Contract, application, o	Contract, application, or farm number that is associated with the payment			
Application/Farm	transaction.				
	Note: If the selected program does not have a contract, application, or farm number, this field will be blank.				
Commodity	A commodity can be an agricultural crop, type of livestock, or other description as determined by a program. If payments are not calculated at a commodity level for the selected program, this field will be blank.				
	Note: Some commodities may be abbreviated because of space limitations on some reports. See Exhibit 10 for additional information on commodity codes used for some programs				

Payment Computed to Zero Report (Continued)

D Sort Order

The information on the report is sorted as follows:

- contract, application, or farm number, if applicable
- producer name.

69 Payment History Report – Summary Level

A Description of Report

The Summary Payment History Report provides information pertinent to each payment/overpayment transaction processed based on the selected search criteria. This report is essentially a snapshot of the data that was used to process the payment/overpayment which can be used:

- for audit purposes
- by users to determine how a payment was computed
- for reviewing data to ensure that payments and overpayments are computed properly.

Example: A payment was issued to IMA Farmer General Partnership, however the user believes the payment was not issued in full. The payment history summary report will list the payment or reduction amount attributed to each member of the partnership.

If a portion of the payment was reduced, the user can then see who the reduction applied to and use the Nonpayment/Reduction Report to determine the reason for the reduction.

B Availability of Data

The information displayed on the report is **not** "real time" data, but is updated every 24 hours. Refer to the legend on the Common Payment Reports Menu to determine the date and time the data was last updated.

C Information Provided on the Report

This report includes transactional data that has been sent to NPS and NRRS for a payment entity or member, as selected by the user through the search criteria. The following information is provided on the summary level payment history report.

--Note: There is a threshold that limits the number of displayed records to 1,000 records. Use the search criteria options to filter the number of records returned.--

70 Payment History Report – Detail Level

A Description of Report

The detail payment history report is program-specific and some programs may not have this report. Users can access the Detail Payment History Report through the Common Payment Reports System, but information about each report is not included in this handbook.

Refer to the applicable program handbook for a description of the information on the Detail Payment History Report.

*--71 Prepayment Report

A Description of Report

The Prepayment Report provides a report of payment entities whose payments may be reduced because of various eligibility conditions. The information on the report allows users to take corrective action, if needed, to ensure that payments are issued timely.

The Prepayment Report may be used by State or County Offices to identify:

- payment entities and members that have payments being reduced because of various eligibility conditions
- where corrective action may be required if a payment was reduced based on incorrect data recorded in the system.

B Availability of the Report

The Prepayment Report will only be available before the start of payment processing for the selected year, program, and program type.

C Availability of Data

The information displayed on the report includes "real time" data.--*

*--71 Prepayment Report (Continued)

D Information Provided on the Report

This report includes information for subsidiary eligibility nonpayment conditions for the payment entity and/or any ineligible member.

Note: Payment entities and members listed on the Prepayment Report will be removed from the report if corrective action is taken.

The following information is provided on the Prepayment Report.

Field	Description						
Name	The name of the payment entity or member that has an ineligible subsidiary eligibility condition. If the payment entity is a joint operation or entity with members, then the payment entity is listed first, even if there was not an actual reduction applicable to the payment entity. The ineligible members are listed directly below the payment entity. The name printed is based on the following from SCIMS: of or individuals - last name, first name, middle name, and suffix for businesses - business name.						
	IF the payment entity is		THEN the following is printed on the

F Prepayment Report Messages

The type of nonpayment conditions that will be determined are general eligibility reductions.

The following table identifies the general eligibility messages that may be listed on the Prepayment Report and the corrective action that may be taken to resolve the error, if applicable.

Notes: See Exhibit 4 for additional information on which payment eligibility rules apply to various programs.

The following messages are listed in alphabetical order.

Message on Prepayment Report	Description/Corrective Action
Entity or joint operation data is recorded on the permitted entity file, but the accumulated member shares do not equal 100 percent and the discrepancy exceeds 1 percent.	If the entity or joint operation is recorded in the Business File application for 2012 and future years, indicating at least 1 contract is subject to 4-PL provisions, then the member shares: • have not been recorded for all members • are not recorded in whole percentages. Example: Shares may be recorded as 0.3333 instead of 33.33%. If the entity or joint operation is only associated with contracts subject to 1-PL provisions, then: • County Offices shall refer the case to the State Office specialist responsible for subsidiary processes
Member data is not recorded in the entity file.	State Offices shall contact PECD for guidance. Producer or member data is not recorded in the Business File application.
	County Offices shall ensure that the joint operation or entity information is recorded in the Business File application and the farm operating plan is not in a suspended status.
	Note: See 3-PL (Rev. 1) for additional information.
	A farm operating plan is suspended in the Business File application because of changes made to the ownership structure of the entity/joint operation through another operation.
	A revised CCC-902 must be filed for the operation to update the member information. See 3-PL (Rev. 1) for additional information.
Member does not meet the substantive	Verify the substantive change flag is updated properly in the business

Redelegations of Authority

None

Embedded Entity

An <u>embedded entity</u> is an entity that has an interest, directly or indirectly, as a stockholder, member, beneficiary, or heir, in another entity that is earning payments.

Entity

An <u>entity</u> is a business with a SCIMS business type other than individual, general partnership, or joint venture.

Entity Without Members

An entity without members is a legal entity but the members do not have an ownership interest.

- *--Member data is not required to be recorded in the Business File System and/or entity file--* software on the System 36 for entities without members. These include the following SCIMS business types:
 - revocable trust using a Social Security number
 - church, charity, or non-profit organization
 - public school
 - Indians Represented by BIA
 - Indian Tribal Venture
 - limited liability company using a Social Security number.

Joint Operation

A <u>joint operation</u> is a business with a SCIMS business type of general partnership or joint venture.

Legal Entity

A <u>legal entity</u> is an entity that is created under Federal or State law that owns land or an agricultural commodity or produces an agricultural commodity. For FSA purposes, a legal entity includes joint operations and entities.

Definitions of Terms Used in This Handbook (Continued)

Payment Entity

A payment entity is a producer associated with an application or contract.

Example: IMA Farmer General Partnership is the producer associated with a DCP contract and is comprised of 4 members. IMA Famer General Partnership is the payment entity that will ultimately receive the DCP payment.

Person

A <u>person</u> is a natural person and does not include a legal entity.

Note: This definition applies to persons under 4-PL provisions and not "person" rules under 1-PL provisions.

Payment Eligibility Overview

A Eligibility Certification/Determination Applicable to Specific Programs

As described in paragraph 13, the web-based eligibility system is read to determine payment eligibility. State and County Offices shall use the following exhibits indicating eligibility certifications/determinations applicable for a specific program and program year.

B DCP/ACRE Payment Eligibility Certifications/Determinations

The following provides the programs administered under DCP/ACRE with the payment eligibility exhibit reference for review.

		Exhibit 5
Program Name	Program Year	Subparagraph
DCP/ACRE Direct	2009 and Future	A
DCP Counter-Cyclical	2009 and Future	В
ACRE	2009 and Future	С

C Disaster Assistance Program Eligibility Certifications/Determinations

The following table lists the programs administered under Disaster Assistance Program with the payment eligibility exhibit reference for review.

		Exhibit 6
Program Name	Program Year	Subparagraph
SURE	2008	A
	2009 and Future	В
ELAP	2008	C
	2009 and Future	D
LFP	2008	E
	2009 and Future	F
LIP	2008	G
	2009 and Future	Н
TAP	2008	I
	2009 and Future	J
NAP	2011 and Future	K

Payment Eligibility Overview (Continued)

D RTCP Program Eligibility Certifications/Determinations

The following table lists the RTCP with the payment eligibility exhibit reference for review.

		Exhibit 7
Program Name	Program Year	Subparagraph
RTCP	2010 and Future	A

E TAAF Program Eligibility Certifications/Determinations

The following table lists the TAAF with payment eligibility exhibit reference for review.

		Exhibit 8
Program Name	Program Year	Subparagraph
TAAF	2008	A
	2009 and Future	В

F Conservation Program Eligibility Certifications/Determinations

The following table lists the conservation programs with the payment eligibility exhibit reference for review.

		Exhibit 9
Program Name	Program Year	Subparagraph
TIP	2012 Through 2014	A
*CRP	2002 and Prior	В
	2003 Through 2008	С
	2009 Through 2013	D
	2014	E
	2015 and Future	F*

DCP/ACRE Payment Eligibility Certifications/Determinations

A DCP/ACRE- Direct - 2009 and Future Years

The following payment eligibility provisions are applicable for DCP and ACRE direct payments for 2009 and future years.

			Applicable to	Members
Certification/			Joint	
Determination	Eligible Values	Not Eligible Values	Operations	Entities
Fraud, including FCIC Fraud	Compliant	Not Compliant	Yes	No

*--Commodity Types Used by Common Payment Reports

A Introduction

Many of the Common Payment Reports include a "Commodity" field that is used by the program to designate the amount processed for an applicable commodity. A commodity can be:

- agricultural crop, such as wheat, corn, etc. used for DCP and ACRE
- type of livestock, such as livestock kind and type used for LIP
- other description as determined by an applicable program.

For some programs, payments may be calculated at a lower level by commodity, but the amount is not actually paid by commodity. SURE is an example where amounts are computed by commodity but accumulated to the producer level and one amount is then paid for the producer's entire farming operation. In cases such as this, the commodity field is "blank" on the Common Reports.

In some cases, the commodity information exceeds the amount of space available to be printed on the report and codes may have to be used to differentiate one commodity amount from another. This exhibit provides a list of commodities and codes used for various programs.--*

*--Commodity Types Used by Common Payment Reports (Continued)

B Commodities Used for LIP

The following:

- provides a list of the commodities used for LIP
- is printed on the Common Reports in the "Commodity" field:
 - Livestock Kind Code
 - Livestock Type Code.

		Livestock	Livestock
Kind Description	Type/Weight Range Description	Kind Code	Type Code
Alpacas	All	ALPAC	01
Beef	Nonadult – Less than 400 pounds	BEEF	01
	Nonadult – 400 to 799 pounds		02
	Nonadult – 800 pounds or more		03
	Adult – Cow		04
	Adult – Bull		05
Buffalo/Beefalo	Nonadult – Less than 400 pounds	BUFF	01
	Nonadult – 400 to 799 pounds		02
	Nonadult – 800 pounds or more		03
	Adult – Cow		04
	Adult – Bull		05
Chickens	Layers/Roasters	CHICK	01
	Broilers/Pullets		02
	Chicks		03
Dairy	Nonadult – Less than 400 pounds	DAIRY	01
	Nonadult – 400 to 799 pounds		02
	Nonadult – 800 pounds or more		03
	Adult – Cow		04
	Adult – Bull		05
Deer	All	DEER	01
