MORGANTOWN, W.Va., Oct. 1, 2024 – U.S. Department of Agriculture’s (USDA) Farm Service Agency (FSA) today announced that all West Virginia counties are accepting applications for the [Emergency Conservation Program](#) (ECP) for producers impacted by drought. Signup for ECP in approved counties starts Oct. 9, 2024, and ends Nov. 15, 2024.

“Recovering from the impacts of natural disasters is never easy, but there’s no need to go it alone,” said John D. Perdue, State Executive Director for FSA in West Virginia. “If you have an immediate need for drought recovery assistance, we’re ready to help but it’s imperative that you call our office to determine program eligibility and obtain a conservation plan and practice approval before you take any action.”

ECP is a performance-based cost-share program that provides funding and technical assistance to farmers and ranchers to implement emergency water conservation measures in periods of severe drought.

Eligible ECP drought practices include:

- Providing emergency water during periods of severe drought for grazing and confined livestock;
- Providing emergency water during periods of severe drought for existing irrigation systems for orchards and vineyards; and
- Portable water pumps for livestock.

FSA county committees will evaluate ECP applications based on a conservation plan developed in consultation with USDA’s Natural Resources Conservation Service. A conservation plan does not guarantee that cost-share funding will be provided.

Producers impacted by drought must apply for ECP assistance before beginning work. FSA's National Environmental Policy Act and environmental compliance review process must be completed before any drought recovery actions are taken. Submitting an application after work has been completed may not qualify for ECP.

FSA is authorized to provide advance payments, up to 25% of the approved cost share, upon the producer's request. The advance cost-share payment must be expended within 60 days from receipt. ECP assistance is reimbursed at no more than 75% of allowable cost after the approved recovery activity is complete. Producers who are considered limited resource, socially disadvantaged and beginning farmers and ranchers can receive up to 90% cost-share.

The 2018 Farm Bill increased the payment limitation for ECP to \$500,000 per natural disaster event.

More Information

Additional USDA disaster assistance information can be found on [farmers.gov](https://www.farmers.gov), including USDA resources specifically for producers impacted by drought. Available resources include the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Loan Assistance Tool](#). Additionally, FarmRaise offers an [FSA educational hub](#) with livestock disaster assistance decision tools as well as farm loan resource videos.
