

USDA Reminds Alaska Producers to File Crop Acreage Reports

News Release | Alaska | June 17, 2021

[View PDF](#)

(Palmer, Alaska), June 17, 2021 – Agricultural producers in Alaska who have not yet completed their [crop acreage reports](#) after planting should make an appointment with their U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) office before the applicable deadline.

“Many USDA programs require producers to file an accurate crop acreage report by the applicable deadline,” said Donna Kramer, Acting State Executive Director in Alaska. “Our FSA staff can assist producers in completing acreage reports, including providing maps.”

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

How to File a Report

The following acreage reporting dates are applicable in Alaska:

May 31, 2021	Nursery
July 15, 2021	All other spring planted crops, CRP, Perennial Forage
<u>For 2022 Crop Year</u>	
September 30, 2021	Value-loss crops and controlled environment crops (except Nursery)
December 15, 2021	Fall-Seeded Small Grains
January 2, 2022	Honey

Acreage reporting dates vary by crop and by county. Contact your local FSA office for a list of acreage reporting deadlines by crop.

Service Center staff continue to work with agricultural producers via phone, email and other digital tools. Because of the pandemic, some [USDA Service Centers](#) are open to limited visitors. Contact your Service Center to set up an in-person or phone appointment.

To file a crop acreage report, you will need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to plant. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA's Risk Management Agency.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP-covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.
