
USDA Offers Disaster Assistance to Arizona Farmers and Livestock Producers Impacted by Wildfires and Drought

News Release | Arizona | July 01, 2021

[View PDF](#)

PHOENIX, July 1, 2021 – Arizona agricultural operations have been significantly impacted by the wildfires and ongoing, severe drought. The U.S. Department of Agriculture (USDA) has technical and financial assistance available to help farmers and livestock producers recover. Impacted producers should contact their local USDA Service Center to report losses and learn more about program options available to assist in their recovery from crop, land, infrastructure and livestock losses and damages.

“Production agriculture is vital to the Arizona’s economy, and USDA stands ready to assist in the recovery from these wildfires and extreme drought conditions,” said Gloria Montañó Greene as Deputy Under Secretary for Farm Production and Conservation (FPAC). “I assure you that USDA employees are working diligently to deliver FPAC’s extensive portfolio of disaster assistance programs and services to all impacted agricultural producers.”

USDA Disaster Assistance for Wildfire and Drought Recovery

Producers who experience livestock deaths due to wildfires may be eligible for the [Livestock Indemnity Program](#) (LIP).

Meanwhile, for both wildfire and drought recovery, the [Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program](#) (ELAP) provides eligible producers with compensation for feed losses as well as water hauling expenses associated with transportation of water to livestock. For ELAP, producers will need to file a notice of loss within 30 days and honeybee losses within 15 days.

Livestock producers may also be eligible for the [Livestock Forage Disaster Program \(LFP\)](#) for 2021 grazing losses due to drought. LFP benefits may be available for loss of grazing acres due to wildfires on federally managed lands on which a producer is prohibited, by a federal agency, from grazing normally permitted livestock.

Additionally, eligible orchardists and nursery tree growers may be eligible for cost-share assistance through the [Tree Assistance Program](#) (TAP) to replant or rehabilitate eligible trees, bushes or vines lost during the drought. This complements [Noninsured Crop Disaster Assistance Program](#) (NAP) or crop insurance coverage, which covers the crop but not the plants or trees in all cases. For TAP, a program application must be filed within 90 days.

“Once you are able to safely evaluate the wildfire or drought impact on your operation, be sure to contact your local FSA office to timely report all crop, livestock and farm infrastructure damages and losses,” said Grace Lamas, Acting State Executive Director for the Farm Service Agency (FSA) in Arizona. “To expedite FSA disaster assistance, you will likely need to provide documents, such as farm records, herd inventory, receipts and pictures of damages or losses”

FSA also offers a variety of direct and guaranteed loans, including operating and emergency loans, to producers unable to secure commercial financing. Producers in counties with a primary or contiguous disaster designation may be eligible for low-interest [emergency loans](#) to help them recover from production and physical losses. Loans can help producers replace essential property, purchase inputs like livestock, equipment, feed and seed, cover family living expenses or refinance farm-related debts and other needs.

Risk Management

Producers who have risk protection through [Federal Crop Insurance](#) or FSA’s [NAP](#) should report crop damage to their crop insurance agent or FSA office. If they have crop insurance, producers should report crop damage to their agent within 72 hours of damage discovery and follow up in writing within 15 days. For NAP covered crops, a [Notice of Loss](#) (CCC-576) must be filed within 15 days of the loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

“Crop insurance and other USDA risk management options are there to help producers manage risk because we never know what nature has in store for the future,” said Jeff Yasui, director of RMA’s Regional Office that covers Arizona. “The Approved Insurance Providers, loss adjusters and agents are experienced and well trained in handling these types of events.”

Conservation

The [Emergency Conservation Program](#) and [Emergency Forest Restoration Program](#) can assist landowners and forest stewards with financial and technical assistance to restore fencing, damaged farmland or forests.

USDA’s Natural Resources Conservation Service (NRCS) in Arizona is currently accepting applications for two unique funding initiatives through of the [Environmental Quality Incentives Program](#)

[\(EQIP\)](#) - reapplication of destroyed practices and drought resiliency incentives.

Reapplication of Destroyed Practices

Financial assistance is available to help Arizona producers reinstall eligible EQIP conservation practices that have been destroyed by fire. If the practices are part of an active EQIP contract, producers can request a modification to their existing contract. If the practices were installed on an EQIP contract that has been completed and now expired, producers can sign up [through their local field office](#) for the reapplication of destroyed practices.

“USDA can be a very valuable partner to help landowners with their recovery and resiliency efforts,” said Keisha Tatem, NRCS state conservationist in Arizona. “Our staff will work one-on-one with landowners to make assessments of the damages and develop approaches that focus on effective recovery of the land.”

Drought Resiliency Incentives

Conservation Incentive Contracts (EQIP-CIC) are a new component of EQIP that can be used to improve watershed health and resilience to drought in Arizona’s snow catchment areas. This new option helps producers mitigate the immediate impacts of drought, while expanding on those conservation efforts to develop long term resiliency to drought and wildfire.

Financial assistance is available through EQIP-CIC for conservation activities such as reducing forest density, forest stand improvement, critical area planting, and biochar production will restore and maintain a forest’s capacity to protect and store water, and improve water quantity and water quality for rural and urban water users downstream.

Applications for both EQIP initiatives are being accepted through July 12, 2021. Please [contact your local NRCS field office](#) to apply.

Assistance for Communities

Additional NRCS programs include the [Emergency Watershed Protection \(EWP\)](#) program, which provides assistance to local government sponsors with the cost of addressing watershed impairments or hazards such as damaged upland sites stripped of vegetation by wildfire, debris removal and streambank stabilization.

Eligible sponsors include cities, counties, towns, or any federally recognized Native American tribe or tribal organization. Sponsors must submit a formal request (via mail or email) to the state conservationist for assistance within 60 days of the natural disaster occurrence or 60 days from the date when access to the sites become available. For more information, please [contact your local](#)

[NRCS office.](#)

“EWP provides immediate assistance to communities to mitigate potential hazards to life and property resulting from the fires and particularly the severe erosion and flooding that can occur after the fire,” Tatem said. “We can work with a local sponsor to help a damaged watershed so that lives and property are protected while preventing further devastation in the community.”

In addition to EWP, Conservation Technical Assistance (CTA) is another valuable service that NRCS can provide following a wildfire. NRCS technical assistance can help fire victims with planning cost-effective post fire restoration practices.

More Information

On farmers.gov, the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Farm Loan Discovery Tool](#) can help producers and landowners determine program or loan options. For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#). For FSA and NRCS programs, they should contact their local [USDA Service Center](#).

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America’s food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
