GAINESVILLE, Fla., July 15, 2021 – Agricultural producers in the US Virgin Islands (USVI) who have not yet completed their [crop acreage reports](#) after planting should make an appointment with their U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) office before the applicable deadline.

“Many USDA programs require producers to file an accurate crop acreage report by the applicable deadline,” said Christy Marshall, Acting State Executive Director in the USVI. “Our FSA staff can assist producers in completing acreage reports, including providing maps.”

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage can prevent the loss of benefits.

How to File a Report

Producers are encouraged to report the crop acreage after each planting. At a minimum we ask that as we enter hurricane season that your report reflect your total plantings to date.

Service Center staff continue to work with agricultural producers via phone, email and other digital tools. Because of the pandemic, some [USDA Service Centers](#) are open to limited visitors. Contact your Service Center to set up an in-person or phone appointment.

To file a crop acreage report, you will need to provide:

- Crop and crop type or variety.
- Intended use of the crop. (grazing or fresh)
- Number of acres of the crop.
- Map with approximate boundaries for the crop. (we can provide)

- Planting date(s).
- Producer shares.
- Irrigated or not.

More Information

For questions, please contact your local FSA office. To locate your local FSA office visit farmers.gov/service-center-locator.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
