
USDA is Providing Organic Producers Pandemic Assistance Certified Organic and Transitioning Operations

News Release | California | December 01, 2021

[View PDF](#)

The U.S. Department of Agriculture (USDA) is providing pandemic assistance to cover certification and education expenses to agricultural producers who are certified organic or transitioning to organic. USDA will make \$20 million available through the new [Organic and Transitional Education and Certification Program \(OTECP\)](#) as part of USDA's broader [Pandemic Assistance for Producers initiative](#), which provides new, broader and more equitable opportunities for farmers, ranchers and producers. The deadline to signup is Jan. 7, 2022.

Eligible Expenses

OTECP funding is provided through the Coronavirus Aid, Relief, and Economic Security Act (CARES Act). Certified operations and transitional operations may apply for OTECP for eligible expenses paid during the 2020, 2021 and 2022 fiscal years. For each year, OTECP covers 25% of a certified operation's eligible certification expenses, up to \$250 per certification category (crop, livestock, wild crop, handling and State Organic Program fee). This includes application fees, inspection fees, USDA organic certification costs, state organic program fees and more.

Crop and livestock operations transitioning to organic production may be eligible for 75% of a transitional operation's eligible expenses, up to \$750, for each year. This includes fees charged by a certifying agent or consultant for pre-certification inspections and development of an organic system plan.

For both certified operations and transitional operations, OTECP covers 75% of the registration fees, up to \$200, per year, for educational events that include content related to organic production and handling in order to assist operations in increasing their knowledge of production and marketing practices that can improve their operations, increase resilience and expand available marketing opportunities. Additionally, both certified and transitional operations may be eligible for 75% of the expense of soil testing required under the National Organic Program (NOP) to document micronutrient

deficiency, not to exceed \$100 per year.

Applying for Assistance

Signup for 2020 and 2021 OTECP began on Nov. 8, 2021, through Jan. 7, 2022. Producers apply through their local Farm Service Agency (FSA) office and can also obtain one-on-one support with applications by calling 877-508-8364.
