MANHATTAN, KANSAS, May 17, 2022 – Agricultural producers and handlers who are certified organic, along with producers and handlers who are transitioning to organic production, can now apply for the U.S. Department of Agriculture’s (USDA) [Organic and Transitional Education Certification Program \(OTECP\)](#) and [Organic Certification Cost Share Program \(OCCSP\)](#), which help producers and handlers cover the cost of organic certification, along with other related expenses. Applications for OTECP and OCCSP are both due October 31, 2022.

“By helping with organic certification costs—long identified as a barrier to organic sales —USDA is helping producers participate in new markets and invest in the long-term health of their operations,” said Farm Service Agency State Executive Director Dennis McKinney. “We launched the Organic and Transitional Education Certification Program to provide additional assistance to organic and transitioning producers weathering the continued market impacts of the COVID pandemic. In response to stakeholder feedback we have aligned the signup dates for our organic programs to help Kansas producers work with USDA and state agencies to complete applications. We are committed to making sure our organic producers have the tools they need to positively shape our local and regional food systems.”

Cost Share for 2022

OTECP covers:

Certification costs for organic producers and handlers (25% up to \$250 per category).

Eligible expenses for transitional producers, including fees for pre-certification inspections and development of an organic system plan (75% up to \$750).

Registration fees for educational events (75% up to \$200).

Soil testing (75% up to \$100).

Meanwhile, OCCSP covers 50% or up to \$500 per category of certification costs in 2022.

This cost share for certification is available for each of these categories: crops, wild crops, livestock, processing/handling and State organic program fees.

Producers can receive cost share through both OTECP and OCCSP. Both OTECP and OCCSP cover costs incurred from October 1, 2021, to September 30, 2022. Producers have until October 31, 2022 to file applications, and FSA will make payments as applications are received.

How to Apply

To apply, producers and handlers should contact the Farm Service Agency (FSA) at their local USDA Service Center. As part of completing the OCCSP applications, producers and handlers will need to provide documentation of their organic certification and eligible expenses. Organic producers and handlers may also apply for OCCSP through participating State agencies.

Additional details can be found on the [OTECP](#) and [OCCSP](#) webpages.

Opportunity for State Agencies

FSA is accepting applications for State agencies to administer OCCSP through July 18, 2022. If a State department of agriculture chooses to participate in OCCSP, both the State department of agriculture and FSA County Offices in that State will accept OCCSP applications and make payments to eligible certified operations. However, the producer or handler may only receive OCCSP assistance by either FSA or the participating State department of agriculture.

More Information

OTECP builds upon OCCSP, providing additional relief to help producers during the pandemic. OTECP uses funds from the Coronavirus Aid, Relief, and Economic Security (CARES) Act; OCCSP is funded through the Farm Bill.

USDA has made other strides to assist organic producers. In 2022, USDA's Risk Management Agency (RMA) increased expansion limits for organic producers with coverage through Whole-Farm Revenue Protection (WFRP). RMA also updated the insurance option to allow producers to report acreage as certified organic or transitioning, as long as organic certification was requested by the acreage reporting date. Also, this year, RMA introduced a new option – Micro Farm – through WFRP designed for producers with small-scale operations that sell locally, which includes organic producers.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and

producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
