DENVER, Colo., June 12, 2023 – Agriculture Secretary Tom Vilsack announced today the U.S. Department of Agriculture (USDA) is accepting more than 1 million acres in this year’s Conservation Reserve Program (CRP) General signup. This is one of several signups that USDA’s Farm Service Agency (FSA) is holding for the program. The results for CRP General signup reflect the continued importance of CRP as a tool to help producers invest in the long-term health, sustainability, and profitability of their land and resources. The signup resulted in 136,513 acres accepted in Colorado.

“This year’s General CRP signup demonstrates the value and continued strength of this voluntary conservation program, which plays an important role in helping mitigate climate change and conserve our natural resources,” said Kent Pepler State Executive Director in Colorado. “Today’s announcement is one of many enrollment and partnership opportunities within CRP, including opportunities through our working lands Grassland CRP, Continuous CRP, and Conservation Reserve Enhancement Program (CREP). USDA will continue working to ensure producers and landowners have the information they need to take advantage of the options that work best for their operations.”

Offers for new land in this General CRP signup totaled about 295,000 acres nationwide. Producers submitted re-enrollment offers for 891,000 expiring acres, reflecting the successes of participating in CRP longer term. The total number of CRP acres will continue to climb in the coming weeks once FSA accepts acres from the Grassland CRP signup, which closed May 26. Additionally, so far this year, FSA has received 761,000 offered acres for the Continuous CRP signup, for which FSA accepts applications year-round.

The number of accepted acres that are enrolled in General CRP will be confirmed later this year. Participating producers and landowners should also remember that submitting and accepting a CRP offer is the first step, and producers still need to develop a conservation plan before contracts become effective on October 1, 2023. Each year, during the window between offer acceptance and land enrollment, some producers ultimately decide not to enroll some accepted acres, without penalty.

General CRP Signup

The General CRP Signup 60 ran from February 27 through April 7, 2023.

Through CRP, producers and landowners establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve soil health and water quality, and enhance wildlife habitat on agricultural land. In addition to the other well-documented benefits, lands enrolled in CRP are playing a key role in climate change mitigation efforts across the country.

In 2021, FSA introduced improvements to the program, which included a new Climate-Smart Practice Incentive to increase carbon sequestration and reduce greenhouse gas emissions. This incentive provides an annual 3, 5, or 10 percent incentive payment based on the predominant vegetation type for the practices enrolled – from grasses to trees to wetland restoration.

Other CRP Signups

[Grassland CRP](#) is a *working lands program* that helps producers and landowners protect grassland from conversion while enabling haying and grazing activities to continue. Lands enrolled support haying and grazing operations and promotes plant and animal biodiversity. Lands are also protected from being converted to uses other than grassland. This year's signup for Grassland CRP ran from April 17 through May 26.

[Continuous CRP](#), in which producers and landowners can enroll throughout the year. Offers are automatically accepted provided the producer and land meet the eligibility requirements and the enrollment levels do not exceed the statutory cap. Continuous CRP includes the State Acres for Wildlife Enhancement ([SAFE](#)) Initiative, the Farmable Wetlands Program ([FWP](#)), and the Conservation Reserve Enhancement Program ([CREP](#)). In CREP, which is available in certain geographies, partnerships with States, Tribes, and other entities are leveraged for participants to receive a variety of added incentives and flexibilities. Also available is the Clean Lakes Estuaries and Rivers (CLEAR) initiative. [CLEAR30](#), a signup opportunity under that initiative available nationwide, gives producers and landowners across the country the opportunity to enroll in 30-year CRP contracts for water quality practices.

More Information

To learn more about FSA programs, producers can contact their local [USDA Service Center](#). Producers can also prepare maps for acreage reporting as well as manage farm loans and view other farm records data and customer information by [logging into their farmers.gov account](#). If you don't have an account, [sign up today](#).

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production; fairer markets for all producers; ensuring access to safe, healthy

and nutritious food in all communities; building new markets and streams of income for farmers and producers using climate smart food and forestry practices; making historic investments in infrastructure and clean energy capabilities in rural America and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
