Farm Service Agency Now Accepting Applications for 2023 Grazing Losses in 24 Eligible Georgia Counties

ATHENS, Ga., Nov. 28, 2023 – The U.S. Department of Agriculture’s (USDA) Farm Service Agency (FSA) is now accepting applications in four additional eligible counties for the Livestock Forage Disaster Program (LFP) to provide financial assistance to eligible livestock producers for 2023 grazing losses due to a qualifying drought. This expands upon a previous [announcement](#) of eligibility for twenty Georgia counties. The deadline to apply for LFP assistance is January 30, 2024.

To date, twenty-four Georgia counties have met the drought severity levels that trigger LFP eligibility for the 2023 program year. The four additional eligible counties are Habersham, Rabun, Towns, and White. Previously announced eligible counties are Bartow, Catoosa, Chattooga, Cherokee, Dade, Dawson, Decatur, Early, Fannin, Floyd, Gilmer, Gordon, Lumpkin, Miller, Murray, Pickens, Seminole, Union, Walker, and Whitfield. For LFP, qualifying drought triggers are determined using the [U.S. Drought Monitor](#). Visit the [FSA LFP webpage](#) for a list of eligible counties and grazing crops.

“Many of our livestock operations have faced the damaging impacts of recent drought conditions,” said Arthur Tripp, State Executive Director for FSA in Georgia. “We are excited that livestock producers in four additional Georgia counties will now be eligible to apply for this critical drought recovery assistance. I highly encourage producers in the eligible counties to reach out to their local USDA

Service Center to learn if they qualify for LFP or other disaster assistance available through our agency.”

LFP provides compensation to eligible livestock producers who have suffered grazing losses for covered livestock and who are also producers of grazed forage crop acreage of native and improved pastureland with permanent vegetative cover or acreage planted specifically for grazing. Grazing losses must occur on land physically located in a county experiencing a qualifying drought during the normal grazing period for the county.

Eligible livestock include alpacas, beef cattle, buffalo/bison, beefalo, dairy cattle, deer, elk, emus, equine, goats, llamas, ostrich, reindeer, or sheep that have been or would have been grazing the eligible grazing land or pastureland during the normal grazing period.

To expedite the application process, producers are encouraged to gather and submit records documenting 2023 losses. Supporting documents may include information related to grazing leases, contract grower agreements, and more.

LFP is part of a broader suite of disaster assistance available through USDA. For more information about FSA’s full suite of disaster recovery options, producers can visit farmers.gov, where the [Disaster Assistance Discovery Tool](#), [Disaster Assistance-at-a-Glance fact sheet](#), and [Loan Assistance Tool](#) can help you determine program or loan options. Producers can also contact their local [USDA Service Center](#) to file a Notice of Loss and learn more about programs fitting their operational needs.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris administration, USDA is transforming America’s food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy, and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
