Hamilton Square, New Jersey 08690

**NJ Notice CP-25**

SCRC Review:

For: County Offices

**Approved Double-Cropping Combinations for 2025**

---

Approved by: Acting State Executive Director

Lindsay Caragher

---

**1 Purpose**

This notice provides a list of New Jersey State Committee double-cropping combination approvals by county that are effective for program year 2025. This notice does not apply to program years prior to 2025.

This notice is reissued to include additional combinations approved by STC.

**2 County Office Action**

**A Contents**

This notice lists double cropping practices approved by STC in each NJ County.

Exhibit 1 lists all approved double cropping combinations for the following counties:

- Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Mercer, Middlesex, Monmouth, Ocean, and Salem

Exhibit 2 lists all approved double cropping combinations for the following counties:

- Hunterdon, Morris, Somerset, Sussex, and Warren

The lists in this notice are considered definitive. If a crop combination is reported to FSA that is not listed in the relevant Exhibit, the combination shall be considered unapproved, and a Subsequent crop code shall be used for the 2<sup>nd</sup> crop.

Disposal Date: indefinite, until rescinded	Distribution: County Offices District Director County Operations Reviewer
--	---

## B Use of Information in Exhibit 1 and 2

County offices shall use Exhibit 1 and Exhibit 2 of this notice as an aid in the proper coding of the Crop Status field on the FSA-578. It can also be used in the determination of crop acreage eligibility in NAP and disaster programs, and for application of payment reductions for FAV in the ARC and PLC programs.

**Note:** These approvals are applicable to FSA programs only, and may not reflect double cropping practices considered acceptable to RMA. Under **no** circumstances will County offices use this exhibit to advise producers on what are considered acceptable double cropping practices for RMA/Crop Insurance purposes.

## C Intended Uses

Crops are sometimes listed with an approval for one Intended Use only. If the Intended Use listed is the Intended Use that represents the crop at full maturity, all other Intended Uses are considered approved automatically.

Examples:

- GR represents WHEAT SRW at full maturity. All other Intended Uses are considered automatically approved.
- Both FH and PR GREEN LEF are full maturity. If one of these Intended Uses is listed, the other and all additional Intended Uses of the crop are considered approved.
- GR is considered full maturity for RYE. If only RYE PR is listed as approved, RYE for GR is **not** automatically approved.

## D Repeat Crops – “R” Code

When the same crop, type, intended use and planting period are reported in succession, this is considered a Repeat crop, not a Double or Subsequent crop. In these cases, an “R” should be used instead of the code listed in the relevant Exhibit of this notice.

Examples:

- HERBS CIL FH PP01 followed by HERBS CIL FH PP01 – the second planting would receive Status Code of “R” for Repeat.
- HERBS CIL FH PP01 followed by HERBS CIL FH PP02 – the second planting would receive the appropriate Status Code from the Exhibit.
- HERBS CIL PR PP01 followed by HERBS CIL FH PP01 – the second planting would receive the appropriate Status Code from the Exhibit.

**E Additional Requests**

COC can recommend additional double cropping practices for approval by STC and inclusion in the approved double cropping combination list. Requests **must** include the crop, type and intended use of both crops being requested as part of the practice. If these are not specified, the request will not be considered.

COC shall include relevant documentation that shows the ability of both crops to attain full maturity during one year for the crop, type and intended use combination being requested. Follow 2-CP (Rev. 16) Par 40 for format and required documentation of recommendations.

Double Cropping combinations must be requested and approved in advance of the crop year. Therefore, a submission deadline to STC from COC is set as **September 1<sup>st</sup>** of the preceding crop year. Example: September 1<sup>st</sup>, 2025 is the deadline to submit requests to STC for 2026 crop year.

Retroactive approvals are not authorized.

**E Questions**

Direct all questions concerning this notice to the State Compliance Specialist.
