

STREAMLINED CROP REPORTING

Some AIPs may allow reporting to include precision ag geospatial data from a producer's planter along with regular crop and acreage information. Contact your crop insurance agent for details.

877-8339 (Local or Federal relay),
(866) 377-8642 (Relay voice users) *FSA-BR-10: May 2016*

Looking to simplify your crop reporting?

You can file your 2017 acreage report through one of the following channels:

- ◆ Your local Farm Service Agency (FSA) county office; or
- ◆ Your Approved Insurance Provider (AIP) via your crop insurance agent.

USDA now has one framework for crop reporting for all USDA programs.

Producers now can report common acreage data just once, as a result of the new Acreage Crop Reporting Streamlining Initiative (ACRSI).

ACRSI will:

- ◆ Improve the customer experience;
- ◆ Reduce the customer burden;
- ◆ Eliminate redundancy in data;
- ◆ Increase data integrity and sharing within USDA; and
- ◆ Provide process efficiencies.

Am I eligible?

ACRSI is available to any producer nationwide who has planted one or more of the approved crops. AIPs will only have access to data for a producer when they have a crop insurance policy in force and only for those crops insured by that producer with that AIP.

What crops are approved?

The approved categories for crop year 2017 are:

- | | | |
|-----------|-----------|--------------|
| ◆ Alfalfa | ◆ Fallow | ◆ Rye |
| ◆ Barley | ◆ Grass | ◆ Sorghum |
| ◆ Canola | ◆ Oats | ◆ Soybeans |
| ◆ Corn | ◆ Peanuts | ◆ Sunflowers |
| ◆ Cotton | ◆ Rice | ◆ Wheat |
| ◆ CRP | | |

These categories comprise more than 94 percent of all reported acreage to USDA's RMA and FSA. USDA may continue to add to this list in the future.

How does ACRSI benefit me?

When you report acreage data, either to your crop insurance agent, or to FSA, the common information from that report will be shared electronically and securely with both offices. While you must still validate the data and sign acreage reports with each office, the common data from the first-filed acreage report will now be available to pre-populate and accelerate completion of the second report, eliminating redundant reporting. Thus, the overall time that you spend filing your acreage reports will be reduced due to this streamlined reporting process.

For crop year 2017, participating producers must certify their information by visiting both the crop insurance and FSA county office, completing maps and validating the electronically shared data.

Contact your local FSA county office or crop insurance agent for more details.
